

1. Record Nr.	UNINA9911006716703321
Autore	Attwood Dennis A
Titolo	Ergonomic solutions for the process industries // Dennis A. Attwood, Joseph M. Deeb, Mary E. Danz-Reece
Pubbl/distr/stampa	Amsterdam ; ; Boston, : Gulf Professional Pub., 2004
ISBN	1417505443 1-280-96455-3 9786610964550 1-4175-0544-3 0-08-047007-6
Descrizione fisica	1 online resource (479 p.)
Altri autori (Persone)	DeebJoseph M Danz-ReeceMary E
Disciplina	620.8/2
Soggetti	Human engineering Chemical engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.

Sommario/riassunto

Work-related injuries, such as back injuries and carpal tunnel syndrome, are the most prevalent, most EXPENSIVE, and most preventable workplace injuries, accounting for more than 647,000 lost days of work annually (according to OSHA estimates). Such injuries, and many others, can be prevented in your facility by establishing an ergonomic design. This book shows you how to apply simple Ergonomic tools and procedures in your plant.Challenging worldwide regulations are forcing some companies to spend thousands of dollars per affected employee in order to comply. This book shows you how
