

1. Record Nr.	UNINA9911006834403321
Titolo	Satellite communication systems // edited by B.G. Evans
Pubbl/distr/stampa	London, U.K., : Institution of Electrical Engineers, c1999
ISBN	1-62870-456-X 1-281-97127-8 9786611971274 0-86341-996-8
Edizione	[3rd ed.]
Descrizione fisica	1 online resource (755 p.)
Collana	IEE telecommunications series ; ; 38
Altri autori (Persone)	EvansB. G (Barry George)
Disciplina	621.382/54
Soggetti	Artificial satellites in telecommunication Telecommunication
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Preface and acknowledgments; Contributors; 1 Introduction. B. G. Evans; 2 Historical overview of satellite communications. P. T. Thompson and J.D. Thompson; 3 The satellite communications business; 4 Radio regulatory considerations relating to satellite communications systems. P. T. Thompson and A. G. Reed; 5 Introduction to antennas. B. Claydon; 6 Propagation considerations relating to satellite communications systems. P. T. Thompson; 7 Interference considerations relating to satellite communications systems. P. T. Thompson; 8 Satellite access techniques. T. Tozer 9 Modulation and modems. T. G. Jeans10 Channel coding. P. Sweeney; 11 Satellite systemns planning. B. G. Evans; 12 Earth-station engineering. J. Miller; 13 Satellite engineering for communications satellites. P. Harris and J. J. Pocha; 14 Payload engineering. D. R. O'Connor; 15 Earth-station and satellite antennas. B. Claydon; 16 Satellite networking. M. A. Kent; 17 Digital audio broadcasting by satellite. P. Shelswell; 18 Digital video broadcasting by satellite. G. M. Drury; 19 Mobile satellite communications. I. E. Casewell; 20 Satellite personal communication networks. L. Ghedia 21 Satellite navigation: a briefintroduction. I. E. Casewell22 VSATs for business systems. R. Heron; 23 Military satellite communications. D.

Bertram; 24 Microsatellites and ID.inisatellites for affordable access to space. M. N. Sweeting; 25 Future trends in satellite communications. B. G. Evans; Appendix A Link budgets and planning: worked examples. B. G. Evans and T. C. Tozer; Appendix B Domestic satellite systems design-a case study (INUKSAT system). B. G. Evans; Appendix C List of abbreviations; Index

Sommario/riassunto

This revised text provides a comprehensive yet practical understanding of the principles and technological issues behind satellite communications. Subjects include satellite networking, interference considerations, digital video broadcasting by satellite, military applications and future trends.
