Sommario/riassunto	Iron Ore 2015 was the seventh in a very successful series of international iron ore conferences jointly organised by the AusIMM and CSIRO. The conferences have now become an important biennial bringing together geologists, geoscientists, mineralogists, metallurgists, managers, engineers, operators, equipment manufacturers and service providers from across the iron ore industry. This volume contains 80 papers, covering topics such as agglomeration, beneficiation, exploration and geology, ferrous burden performance, materials handling, mining, new equipment and environment, ore characterisation and geometallurgy, and project development.
