| Sommario/riassunto      | The development of technical leadership capabilities is often overlooked as a training requirement in organisations but these are key to business success. In this book, management experts Brian Sutton and Robina Chatham describe six management techniques including unlocking your creative potential, learning by developing others and managing your time. These techniques will help you develop your leadership capabilities and grow as a leader; with real life examples, tips and mini exercises, you'll also boost your soft skills as you progress your personal and professional development. ----- "The structure of the book is constantly engaging and it's encouraged me to think in entirely new ways about established topics." Simon La Fosse, Founder & Chairman of La Fosse Associates --- "The advice is sound and if used will help you to motivate others, to help you help them (or yourself) achieve vision to mission." Daniel Breston, Director of Coaching and Continuous Improvement, Qriosity Limited |
