

1. Record Nr.	UNINA9911006991403321
Autore	Ebnesajjad Sina
Titolo	Fluoropolymers applications in chemical processing industries : the definitive user's guide and databook // Sina Ebnesajjad, Pradip R. Khaladkar
Pubbl/distr/stampa	Norwich, NY, : William Andrew Pub., c2005
ISBN	9786612253164 0-08-094709-3 0-8155-1729-7 1-59124-847-7
Descrizione fisica	1 online resource (593 p.)
Collana	PDL handbook series
Altri autori (Persone)	KhaladkarPradip R
Disciplina	668.4/238
Soggetti	Fluoropolymers - Industrial applications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front Cover; Fluoropolymers Applications in Chemical Processing Industries; Copyright Page; Table of Contents; Chapter 1. Introduction to Fluoropolymers; 1.1 Introduction; 1.2 What are Fluoropolymers?; 1.3 Fundamental Properties of Fluoropolymers; 1.4 Developmental History of Fluoropolymers; 1.5 Examples of Uses of Fluoropolymers; References; Chapter 2. Materials of Construction; 2.1 Introduction; 2.2 Historical Background; 2.3 Definition of Polymer-based Materials; 2.4 Comparison Between Polymer-based Materials and Metals; 2.5 Applications of Polymer-based Materials for Corrosion Control ReferencesChapter 3. Properties of Neat (Unfilled) and Filled Fluoropolymers; 3.1 Introduction; 3.2 Influence of Processing on Fluouoplastics; 3.3 Chemical Compatibility of Fluoropolymers; 3.4 Properties and Characteristics of PTFE; 3.5 Environmental Stress Cracking; 3.6 Permeation Fundamentals; 3.7 Properties and Characteristics of Melt-processible Fluoroplastics; References; Chapter 4. Selecting Fluoropolymers for Corrosion Control; 4.1 Introduction; 4.2 Economics of Selecting Fluoropolymers; 4.3 Preparing to Determine Compatibility; 4.4 Current Technology for Determining Compatibility Chapter 5. Manufacturing of Parts from Polytetrafluoroethylene Polymers5.1 Granular Resin Processing; 5.2 Fine Powder Resin

Processing; 5.3 Fluoropolymer Dispersion Processing; References;  
Chapter 6. Manufacturing Parts from Melt-processible Fluoropolymers;  
6.1 Introduction; 6.2 Materials of Construction; 6.3 Rheology of  
Fluoropolymer Melts; 6.4 Thermal Stability of Fluoropolymers; 6.5 Melt  
Extrusion; 6.6 Fluoropolymer Tube Extrusion; 6.7 Fluoropolymer Film  
Extrusion; 6.8 Injection Molding; 6.9 Rotational Molding; 6.10 Other  
Part Manufacturing Techniques; 6.11 Vacuum Bagging; References  
Chapter 7. Fabrication Techniques for Fluoropolymers7.1 Introduction;  
7.2 Machining; 7.3 Adhesive Bonding Methods; 7.4 Welding and  
Joining; 7.5 Heat Bonding; 7.6 Thermoforming; 7.7 Other Processes;  
References; Chapter 8. Design and Construction of Linings and Vessels;  
8.1 Introduction; 8.2 Lining of Vessels; 8.3 Lining of Pipes and Fittings;  
8.4 Lined Valves; 8.5 Lined Hoses; 8.6 Lined Expansion Joints; 8.7  
Lining or Coating of Internals; 8.8 Design and Fabrication of Vessels for  
Lining; 8.9 Shop Versus Field Fabrication; References; Chapter 9.  
Operations and Maintenance; 9.1 Operations  
9.2 Maintenance9.3 Repairs; Chapter 10. Failure Analysis; 10.1  
Introduction; 10.2 Part Failure; 10.3 Defect Analysis; 10.4 Application  
of Failure Analysis Methodology; 10.5 Surface Analysis; 10.6 Examples  
of Failure Analysis; 10.7 Physical Defects Due to Part Fabrication;  
References; Chapter 11. Modeling and Mechanical Analysis of  
Fluoropolymer Components; 11.1 Introduction; 11.2 Review of  
Modeling Techniques; 11.3 Currently Available Material Models; 11.4  
Failure and Deformation Predictions; 11.5 Examples; 11.6 Summary;  
References; Chapter 12. Cost Analysis; 12.1 Introduction  
12.2 Cost Analysis

---

### Sommario/riassunto

This is a self-contained collection of data and information on applications of fluoropolymers components for corrosion control in chemical processing industries. Due to their superior properties, fluoropolymers have been rapidly replacing metal alloys for preserving the purity of processing streams in the chemical processing, plastics, food, pharmaceutical, semiconductor, and pulp and paper industries.
