

1. Record Nr.	UNINA9911007053003321
Autore	Loe David
Titolo	Surface Reflectance and Colour : Its Specification and Measurement for Designers / / David Loe
Pubbl/distr/stampa	London : , : The Society of Light and Lighting : National Physical Laboratory, , 2001
ISBN	1-62870-994-4
Descrizione fisica	1 online resource (32 pages)
Collana	Lighting Guide ; ; 11
Disciplina	535.60287
Soggetti	Colorimetry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Almost all calculations used in the design of interior lighting involve detailed knowledge of the reflectance values of the walls and other surfaces which are rarely known. All too often the unfortunate designer has to work on an intelligent guess. This lighting guide attempts to tackle this problem in a way which is useful to lighting designers. Its chapters take the reader through the basic physics of light reflection, the reflection properties of building materials and some relevant systems of colour specification.
