

1. Record Nr.	UNINA9911007066303321
Autore	Kim Jong Hak
Titolo	Composite Materials and Material Engineering V
Pubbl/distr/stampa	Zurich : , : Trans Tech Publications, Limited, , 2021 ©2021
ISBN	9783035728194 3035728194 9781523145393 1523145390 9783035738193 303573819X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (187 pages)
Collana	Key Engineering Materials ; ; v.Volume 889
Disciplina	620.1
Soggetti	Composite materials Materials science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Composite Materials and Material Engineering V -- Preface -- Table of Contents -- Chapter 1: Bio-Based and Biodegradable Composite Materials -- Mechanical Properties and Thermal Analysis of Salago and Coir Hybrid Fiber Reinforced Epoxy Resin Composites -- Fabrication of All-Cellulose Composite from Cotton Fabric via NaOH/Urea Solvent Using Vacuum Bagging-Assisted Process -- An Environmentally Friendly Recycled-Polyethylene Composite Reinforced by Diatomaceous Earth and Wood Fiber -- Eco-Friendly Composites Based on Bitter Tea Oil Meal and Polylactic Acid -- Investigation of Mechanical Properties of Silk and Epoxy Composite Materials -- Biocomposites Based on Agar and Cellulose Nanofibers Prepared from Carrot Slag -- Influence of Internal Mixing Condition on Properties of Conductive Biocomposites between Poly(Lactic Acid) and Hybrid Graphene -- The Development of Thermostatically Biodegradable Composite -- Chapter 2: Mechanical Properties of Composite Structures -- Passive Morphing in Aerospace Composite Structures -- Improvement of Impact Energy Absorption of Curved Thin Chopped

Tape CFRP Shell by Adding Submicron Glass Fiber into Matrix --  
Insertion of a Viscoelastic Layer to Reduce the Propagation of Energy by  
Vertical Impacts of Slamming in Planing Hull Vessels -- Chapter 3:  
Materials and Technologies of Chemical Production -- Effect of Valley  
Beater Refining on Tensile Properties of Molded Pulps from Rice Straws  
-- Effect of Mono- and Bilayer Coating of Nanofibrillated Cellulose, its  
Modification, and Shellac on Properties of Molded Pulps --  
Investigation of Different Membrane Porosities on the Permeate Flux of  
Direct Contact Membrane Distillation -- Facile Fabrication of N-Slow  
Release Fertilizer Hydrogel Beads by Alginate-Based Composites.  
Preparation and Properties of Urea Slow-Release Fertilizer Hydrogel by  
Sodium Alginate-Gelatin Biopolymer -- Chapter 4: Functional Materials  
-- Formation of Cariogenic Bacterial Biofilm on Vanillin-Incorporated  
Resin-Based Dental Sealant -- Zinc Oxide-Based Pseudocapacitors with  
Electrospun Poly(Vinylidene Fluoride)/Poly(Ionic Liquid) Nanofibers as  
Solid Polymer Electrolyte -- Chapter 5: Coatings and Adhesives --  
Compressive Properties of Electroless Ni-P Coating Reinforced  
Magnesium Alloy Foams -- Reinforcing Adhesives Using Carbon  
Nanotubes for the Carbon Fibre Reinforced Plastic Composite and Metal  
Joint -- EPDM/SBR Blends for Skim Compound of Steel Cord Conveyor  
Belt: Mechanical Properties, Thermal Stability and Adhesion Level --  
Chapter 6: Corrosion and Forming of Steel -- 3-Dimensional  
Microstructure Investigation of High Temperature Corrosion of Boiler  
Tube Material -- Analysis and Correction of Defects for Deep Drawing  
Process of Stainless Sink by Use of Finite Element Simulation -- Chapter  
7: Building Materials and Technology -- Elastic Properties of Polymer  
Modified Steel Fibre Reinforced High Strength Concrete -- The  
Technique of Single-Component Synchronous Grouting Allocation to  
Resist Floating in High Pressure Water-Rich Formation -- Eco-Friendly  
Innovation of Non-Fired Ceramic Tiles from Rice Husk Ash and  
Recycled Glass Cullet -- Influence of Boric Acid Additive on Physical  
Properties of Utilizing Wastes for Producing Eco-Friendly Fired Clay  
Tiles -- Keyword Index -- Author Index.

---

Sommario/riassunto

Selected peer-reviewed full text papers from the 6th International  
Conference on Composite Materials and Material Engineering (ICCMME  
2021) Selected peer-reviewed papers from the 6th International  
Conference on Composite Materials and Material Engineering (ICCMME  
2021) January 12-14, 2021 (virtual), Bangkok, Thailand.
