

1. Record Nr.	UNINA9911007101803321
Autore	Andronov Volodymyr
Titolo	Problems of Emergency Situations
Pubbl/distr/stampa	Zurich : , : Trans Tech Publications, Limited, , 2021 ©2021
ISBN	9781523145607 1523145609 9783035738896 3035738890
Edizione	[1st ed.]
Descrizione fisica	1 online resource (553 pages)
Collana	Materials Science Forum ; ; v.Volume 1038
Soggetti	System safety Insurance engineering Building materials - Safety measures Environmental engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Problems of Emergency Situations: Materials and Technologies II -- Preface -- Table of Contents -- Chapter 1: Properties and Processing Technologies of Structural Metals -- Low Cycle Fatigue of Structural Alloys -- Planning an Experiment for Low-Cycle Fatigue under Conditions Deep Cooling -- Repeatability of Sheet Material Formation Results and Interchangeability of Processing Modes at Multi- Pass Laser Formation -- Stress-Strain State and Structural-Phase Transformations of Metal Articles Obtained by Laser Shaping -- Investigation of the Properties of Powder Materials Using Computer Modeling -- Analysis of the Effect of Mechanical Oscillations Generated during Welding on the Structure of Ductile Constituent of Products Made of Steel 10G2FB -- Chapter 2: Coatings and Surface Treatment -- Electrochemical Synthesis of Crystalline Niobium Oxide -- Research of the Influence of Silicate Fillers on Water Absorption and Microstructure of Styrene-Acrylic Dispersion Coatings -- Alternative Strengthening of Jewelry Tools Using Chemical-Thermal and Local Surface Treatments -- Electrochemical Formation of Oxide Films on the Titanium Alloy of

Ti6Al4V in Ethylene Glycol-Water Electrolytes to Produce Bioinert Coatings and Increase the Corrosion Resistance of Medical Implants -- Research of the Microstructure of the Deposited Layer during Electric Arc Surfacing with Control Impacts -- Application of Thermo-Frictional and Chemical-Thermal Methods Treatments for Surface Strengthening of Materials -- Investigation of the Heat-Affected Zone Properties During Cladding of Power Equipment with Austenitic Materials Using Control Mechanical Impacts on the Strip Electrode -- Studying the Effect of Fuel Elements Structural Materials Corrosion on their Operating Life -- Chapter 3: Polymers and Composites. Research of Safe Technology of Impregnation of Heated Reinforcing Materials with Binder -- Use of Silicone Materials in Modern Structures of Highly Functional Technical Means of Rehabilitation -- The Thermal Destruction and Coke Formation Intensity Influence on the Delamination and Destruction of Fiber Reinforced Plastics with a Unidirectional Filler under High Temperature Conditions -- The Deformable and Strength Characteristics of Nanocomposites Improving -- Experimental Substantiation of Antimicrobial Efficiency of a New Composite Polymeric Material Based on Poly(2-Hydroxyethyl Methacrylate) under the Action of Low-Intensity Current without External Power Supplies -- An Experimental Study on Elastic and Strength Properties of Additively-Manufactured Plastic Materials -- Sorption Resistance Studying of Environmentally Friendly Polymeric Materials in Different Liquid Mediums -- Chapter 4: Functional Materials and Chemical Technologies -- Thermodynamics of Solid-Phase Exchange Reactions Limiting the Subsolidus Structure of the System  $\text{MgO-Al}_2\text{O}_3\text{-FeO-TiO}_2$  -- Thiocarbamide-Citrate Electrolytes as an Alternative to Cyanide Electrolytes in Solving the Problems of Environmental Protection and Prevention of Emergency Situations -- Influence of Basic Oxides Ratio  $\text{Li}_2\text{O/Al}_2\text{O}_3$ ,  $\text{SiO}_2\text{/Al}_2\text{O}_3$  and  $\text{H}_2\text{O/Al}_2\text{O}_3$  on Physical, Rheological and Colloidal-Chemical Properties of Lithium Containing Aluminosilicate Suspensions in the System  $x\text{Li}_2\text{O-Al}_2\text{O}_3\text{-}n\text{SiO}_2\text{-}m\text{H}_2\text{O}$  -- Metal Hydride Technologies for Separation of Hydrogen Isotopes -- Influence of  $\text{ANO}_3$  and  $\text{ANO}_3\text{-}n\text{H}_2\text{O}$  Nitrates on the Deformation Properties of Aluminosilicate Adhesives for Wood Products and Structures -- Research of Operational Properties of Household Fabrics for Production of Protective Masks -- Chapter 5: Materials and Technologies for Environmental Engineering. Colloid-Chemical Regularities of Reagent Wastewater Treatment of Dairies -- Use of PET Granules for Improving a Surface Runoff Treatment -- Co-Mo-W Galvanochemical Alloy Application as Cathode Material in the Industrial Wastewater Treatment Processes -- Treatment of Real Wastewater from Organic Contaminants by Using Biochar -- Synthesis of Activated Carbon from Plant Raw Materials by a Self-Activation Modified Method -- Ecological Aspects of Clay Sorption Materials Usage in Leather and Fur Production Technologies -- Utilization of Galvanic Enterprises Sewage -- Ash-Slag Waste of the Coal-Fired Thermal Power Plant as a Resource for the Construction Industry -- Technology Placement of Drilling Waste Storage with the Use of Soil Cement Screens -- Research of Technical and Economic Properties of Material of Porous Fuel Briquettes from the Solid Combustible Waste Impregnated with Liquid Combustible Waste -- Chapter 6: Building Materials -- Fine-Grained Concrete for Repair and Restoration of Building Structures -- Experimental Studies of Fiber-Reinforced Concrete under Axial Tension -- Experiment Planning for Prospective Use of Barium-Containing Alumina Cement for Refractory Concrete Making -- Influence of Temperature Fields on the Quality of Dried Wood Products -- Investigation of the Limit of Fire Resistance of

a Steel Beam at Loss of Integrity of a Fire-Resistant Lining -- Development of a Bitumen-Polymer Composition, Resistant to Atmospheric Influences, Based on Petroleum Bitumen and their Properties Study -- Chapter 7: Materials and Technologies for Preventing of Technogenic Emergencies -- Research of the Chlorine Sorption Processes when its Deposition by Water Aerosol -- Experimental Study of the Insulating Properties of a Lightweight Material Based on Fast-Hardening Highly Resistant Foams in Relation to Vapors of Toxic Organic Fluids.

Influence of Cracks on the Safe Functioning of Building Structures -- Solution of the Problem of Operational Reliability and Environmental Safety of Transport Pipeline Systems -- Hydrogen Sulphide in Industrial Enterprises Water Management Infrastructure - The Factor of Chemical and Microbiological Corrosion Concrete Degradation of Water Facilities -- Investigation of the Influence of the Physical Properties of Landfill Soils on the Stability of Slopes in the Context of Solving Civil Security Problems -- Detection of Dangerous Defects and Damages of Steel Building Structures by Active Thermography -- Applying Ultrasound Detection Devices to Examine Prties of Concrete Structures -- Numerical Evaluation of Safety Wall Bending Strength during Hydrogen Explosion -- Chapter 8: Materials and Technologies of Fire Protection -- Regarding the Formation of Wood Material Fire Protection and the Mechanism of its Action -- Research of Pyrophoric Compounds in Order to Reduce their Hazard -- Investigation of Gas Formation Processes in Cotton Fabrics Impregnated with Binary Compositions of Ethyl Silicate - Flame Retardant System -- The Use of Sol-Gel Method for Obtaining Fire-Resistant Elastic Coatings on Cotton Fabrics -- Investigation of the Processes of Formation of a Fire Retardant Coating -- Thermodynamic Study of Fire-Protective Material -- Features of Evaluation of Fire Resistance of Reinforced Concrete Ribbed Slab under Combined Effect "Explosion-Fire -- Enhancing the Fire Resistance of Concrete Structures by Applying Fire-Retardant Temperature-Resistant Metal Coatings -- Research of Fire Resistance of Elements of Steel Frames of Industrial Buildings -- Modeling of Non-Stationary Heating of Steel Plates with Fire-Protective Coatings in Ansys under the Conditions of Hydrocarbon Fire Temperature Mode.

Determination of the Fire-Retardant Efficiency of Magnesite Thermal Insulating Materials to Protect Metal Structures from Fire -- Research of Mechanism of Fire Protection with Wood Lacquer -- Investigation of the Effect of Fillers on the Properties of the Expanded Coke Layer of Epoxyamine Compositions -- Keyword Index -- Author Index.

---

#### Sommario/riassunto

Selected peer-reviewed full text papers from International Scientific Applied Conference "Problems of Emergency Situations" (PES 2021)

Selected, peer-reviewed papers from the International Scientific Applied Conference "Problems of Emergency Situations" (PES 2021), May 20, 2021, Kharkiv, Ukraine.
