

1. Record Nr.	UNINA9911007111803321
Autore	Shi Cai Jun
Titolo	Materials in Machinery and Construction
Pubbl/distr/stampa	Zurich : , : Trans Tech Publications, Limited, , 2021 ©2021
ISBN	9781523145379 1523145374 9783035738117 3035738114
Edizione	[1st ed.]
Descrizione fisica	1 online resource (474 pages)
Collana	Materials Science Forum ; ; v.Volume 1036
Altri autori (Persone)	QianJue Shi JianXi Gao NiuDi Tao PanFu Sheng HeLang
Disciplina	691
Soggetti	Cement composites Building materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Materials in Machinery and Construction -- Preface -- Table of Contents -- Chapter 1: Steel and Alloys -- Mechanical Properties and Microstructure of A356-T6 Aluminum Alloy Wheel Hub Based on Casting-Spinning Process -- Effects of Tempering Temperature on the Microstructure and Mechanical Properties of Low Alloy Ultra-High Strength 45CrNiSiMnMoVA Steel -- Research Progress of Effect of Heat Treatment on Microstructure, Phase Transformation Behaviors and Memory Properties in Ti-Ni Based Shape Memory Alloys -- Chapter 2: Materials for Energy Storage, Electronics and Optoelectronics -- Research Progress and Application of Modified Silicon-Based Anode Materials for Lithium-Ion Batteries -- Synthesis of Self-Supporting ZnO Nanowire Array Film and its Optical Property and Room Temperature Ferromagnetism -- Study on Spectral Structure and Photoelectric Properties of LED Healthy Light Source -- Patterning Method for

Nanowire Transparent Conductive Films -- Research Progress in Silver Zinc Oxide Electrical Contact Material -- Chapter 3: Nanomaterials and Composites -- Research and Analysis of Graphene Coatings Based on Knowledge Mapping -- Research on Purification Technology of Ultra-Large Flake Graphite Based on Alkali-Acid Method -- Study on the Effect of Reduction Temperature on the Catalytic Activity of Fe-Mo/Al₂O₃ Catalyst and the Microstructure of Carbon Nanotubes -- Preparation and Properties of Straw Fiber/Poly(lactic Acid) Composites -- The Influence of Fe/Al Molar Ratio on Microreactor-Based Catalyst Preparation and Carbon Nanotube Preparation -- Adsorption Properties Graphene-Based Composites on Lead(II) Ions -- Preparation and Properties of a New Type of Coal Dust Suppressant -- Chapter 4: Ceramic Based Materials -- Research Progress of Preparation and Interfacial Reaction of Ceramic Particles Reinforced Iron-Based Alloy. Performance Comparison of Aerospace High-Temperature Resistant Ceramic Fiber Felt -- Stability Analysis of Thermocapillary Convection of B₂O₃/Sapphire Melt in an Annular Pool -- Effect of Additives on Thermal Conductivity of Si₃N₄ Ceramics -- Chapter 5: Cement Materials and Geopolymers -- Influence of Uranium on the Hydration Properties of the Cement Clinker Minerals -- Secondary Sintering Cement Clinker in SO₂ Atmosphere: Composition and Structure Effects -- Self-Healing Properties of Ultra-High Toughness Fly Ash Based Geopolymer under Air and Water Environments -- Synthesis of Belite-Ye'elimite-Ternesite Cement Clinker -- Hydration Modification of Cement in the Presence of Diethanol-Isopropanolamine -- Research Progress on the Hydration of Portland Cement with Calcined Clay and Limestone -- Different Chlorides Attack on the Hydration of Calcium Aluminate Cement at 5~40°C -- The Influence of Various Gypsum Dosage, Specific Area of Cement and Water Reducers on Bleeding of Fresh Cement Paste Using Low-Field NMR -- Effect of Steel Slag on Shrinkage Characteristics of Calcium Sulfoaluminate Cement -- Synthesis of Fly Ash-Based Zeolite and its Research Progress in Wastewater Treatment -- Effect of Styrene-Acrylic Emulsion on Crack Resistance of Cement-Based Materials -- Study on the Mechanical Properties and Heavy Metal Ions Immobilization Capability of Solidified Body for MSWI Fly Ash with Geopolymer -- Composition and Analysis of Domestic Patented Sleeve Grouting Material -- Research on Grouting Materials for Underground Construction Projects -- Experimental Study on Mechanical Properties and Micro-Mechanism of All-Solid-Waste Alkali Activated Binders Solidified Marine Soft Soil -- Performance Optimization of Cement-Fly Ash Grouting Material Based on Response Surface Methodology -- Chapter 6: Concrete. Research Progress on Carbonation Resistance of Alkali-Activated Slag Cement Concrete -- Development on the Corrosion of Steel Fiber and Prevention in the Ultra-High Performance Concrete (UHPC) -- Application of Advanced Composite Cementitious Materials and High Performance Admixtures in High Performance Shotcrete -- Investigation on Electrical Resistance of Chloride Penetration of Alkali Activated Slag Concrete -- Influence and Mechanism Analysis of Particle Size Distribution of Multi-System Mineral Admixture on Concrete Performance -- Research on the Influence of Water Storage Medium on early Planting Performance of Portland Cement Foamed Concrete -- Effect of All-Component Recycled GFRP on Physical-Mechanical Properties and Microstructures of Concrete -- Influence of Glass Powder on Rheological Properties of Ultra-High Performance Concrete Paste -- Misestimation of the ITZ Thickness around Non-Spherical Aggregates -- Chapter 7: Pavement and Insulation Materials -- Preparation and Analysis of External Walls with the Phase Change

Facing Tile for Energy Savings -- Compatibility and Storage Stability of Asphalt Binder Modified by Styrene-Butadiene-Styrene (SBS) Graft Copolymer -- Keyword Index -- Author Index.

Sommario/riassunto

Selected peer-reviewed full text papers from the 2nd Conference on Research and Application of Advanced Cementitious Materials and Advanced Materials Forum (CRAACM & AMF).
