

1. Record Nr.	UNINA9911007134703321
Titolo	Significance of tests for petroleum products / / Salvatore J. Rand and Allen W. Verstuyft, editors
Pubbl/distr/stampa	ASTM International
ISBN	0-8031-7109-9 1-5231-2674-4
Disciplina	665.5
Soggetti	Petroleum - Testing Petroleum products - Testing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"Technology and ASTM International are undergoing accelerating change. To quote Charles Darwin, "It is not the strongest of the species that survives, nor the most intelligent that survives. It is the one that is the most adaptable to change." Analytical method standards are often available from ASTM International within weeks of their being voted on for approval. The response of the various committees of ASTM International to new developments and emerging needs in the industrial and petroleum fuels and lubricants as well as alternate fuel industries, and to unexpected occurrences in the field, is both swift and focused. It is because of this unprecedented and exponential increase in new testing methods that Manual 1 is being revised only seven years following its prior publication"--
