

1. Record Nr.	UNINA9911007162203321
Autore	Mertens Anne Isabelle
Titolo	Metal Matrix Composites
Pubbl/distr/stampa	Zurich : , : Trans Tech Publications, Limited, , 2023 ©2023
ISBN	9783035738988 303573898X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (663 pages)
Altri autori (Persone)	KolisnychenkoStanislav
Disciplina	620.16
Soggetti	Metallic composites Composite materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Metal Matrix Composites -- Preface -- Table of Contents -- Chapter 1: Aluminium Matrix Composites -- Synthesis and Characterization of Aluminum Matrix Composites Reinforced with SiC-Graphene Core-Shell Nanoparticles -- Effect of Stainless Steel Flakes Content on Mechanical Properties and Microstructure of Cast 96.66% Pure Aluminum -- Experimental Investigation on Mechanical and Wear Properties of Al7075-B4C-TiO2 Composite -- Production of Aluminium Based MMCs by Short-Time Ammonia Gas Flow Milling -- Semi-Solid Processing of Nano-SiCP/ Al-Si Composites and Mechanical Properties with Rheo-Casting -- Effect of Silicon Nitride (Si3N4) Addition on the Mechanical and Tribological Performance of Al-Fe-Si Alloy (AA8011) -- Hybrid Effect of ZrB2+Si3N4 on the Microstructure and Mechanical Properties of AA8011 for Service Life Improvement -- Multiscale Finite Element Simulation of Thermal Properties and Mechanical Strength of Reduced Graphene Oxide Reinforced Aluminium Matrix Composite -- Effect of Cast Geometries on Particle Dispersion in Metal Matrix Composites -- Effect of ZnO Particles on Microstructure, Microhardness and Wear Behaviour of AA7068 Metal Matrix Composites Synthesized by Powder Metallurgy -- Investigation of the Creep Resistance of a Spray-Compacted Si-Particle Reinforced Al-Based MMC (Dispall® S270) -- Mechanical Properties of Nano SiC-Reinforced Aluminum A356

Fabricated by Stir Casting Method -- Evaluation of Wear Rate of Aluminium Hybrid Composites Fabricated through Stir Casting Technique -- Erosion-Corrosion Behavior of Al-20%Ni-Al₂O₃ Metal Matrix Composites by Stir Casting -- Effect on the Mechanical Properties of Aluminum-Based Hybrid Metal Matrix Composite Using Stir Casting Method -- Synthesis and Mechanical Property Evaluation of Hot Forged Aluminium Alloy Reinforced with Nano Alumina. Experimental Study Pertaining to Microwave Sintering (MWS) of Al-Metal Matrix Composite - A Review -- Microstructural Characterization of Microwave Processed Al-SiCP Metal Matrix Composites Subjected to Extrusion -- Effect of Processing Conditions on Bonding Strength at Al (Si)/Diamond Interfaces -- Determination on the Effect of Al₂O₃/B₄C on the Mechanical Behaviour of Al-6.6Si-0.5Mg Alloy Cast in Permanent Mould -- Processing of Nickel-Copper Coated Carbon Fibre Rods Reinforced Al₆₀₈₂/4% Al₂O₃/2%Gr Matrix Composites -- On the Study of a TiB₂ Nanoparticle Reinforced 7075Al Composite with High Tensile Strength and Unprecedented Ductility -- Additive Manufacturing of a CNT/Al₆Si Composite with the Nanolaminated Architecture via Cold Spray Deposition -- Evaluation of Effective Thermal Conductivity of Metal Matrix Composites by Using Image-Based Calculation -- Development and Characterization of Al₂O₃ and SiC Reinforced Al-Cu Metal Matrix Hybrid Composites -- Rice Husk Ash Reinforced Aluminium Metal Matrix Composites: A Review -- Density, Hardness, and Wear Responses of Rice Husk Ash Reinforced Aluminium Composites -- Wear Characteristics of Al₇₀₇₅/Al₂O₃/SiC Hybrid Metal Matrix Nano Composites -- Synthesis and Characterization of Novel Nickel Coated Carbon Fibre Rod Reinforced Aluminium Metal Matrix Composite Material for using in Automobile Application -- Experimental Study on Reinforced Aluminium Metal Matrix Composites with B₄C through Different Techniques -- Effect of Processing Parameters on Mechanical Properties of Al₇₁₇₅/Boron Carbide (B₄C) Composite Fabricated by Powder Metallurgy Techniques -- Validation of Archimedes Method and Acid Dissolution Test for Volume Fraction Determination of Aluminum Alloy Composites Reinforced with Ceramic Particles.

Fabrication of Metal Matrix Composites with Thermally Unstable Reinforcements by Spark Plasma Sintering -- Electromagnetic Methods for Production of Aluminium Metal Matrix Composites -- Study on Mechanical Properties of AA6061/SiC/B₄C Hybrid Nano Metal Matrix Composites -- Corrosion of Aluminum Metal Matrix Composites: A Review of the Effect of Manufacturing Processes, Processing Routes and Secondary Phases -- Fabrication of Carbon Nanotube/Aluminum Matrix Composites by Ball Milling and Cold Press Processing -- Effect of Particle Morphology on Thermal Properties of TiB₂ Particle Dispersed Pure Aluminum Composites -- Chapter 2: Titanium Matrix Composites -- Microstructure Characterization of In Situ Ti-TiB Metal Matrix Composites Prepared by Powder Metallurgy Process -- Tensile Fracture of TiB Whisker Reinforced Ti Alloy Matrix Composites -- Multi-Objective Optimisation of Laser Deposition of Metal Matrix Composites for Surface Coating Using Principal Component Analysis -- Microstructural Evolution of Metal Matrix Composites Formed by Laser Deposition of Ti-6Al-4V Wire and WC-W₂C Powder -- Chapter 3: Magnesium Matrix Composites -- Evaluation of Fatigue Behavior of Silicon Carbide Particles Reinforced with Magnesium Alloy Metal Matrix Composites -- Recent Studies on the Fabrication of Magnesium Based Metal Matrix Nano-Composites by Using Ultrasonic Stir Casting Technique - A Review -- A Review on Exploration of Magnesium Matrix Composites -- A Review of Magnesium Based MMC Fabrication

Techniques for Biomedical Applications -- Chapter 4: High-Temperature Alloys Matrix Composites -- Selective Laser Melting of Mixed EP648-Alumina Powder -- Alumina Reinforced EP648 Metal Matrix Composite Produced by Selective Laser Melting Powder Bed Fusion Additive Technology -- High Entropy Based Composites - An Overview.

Influence of Distinct Manufacturing Processes on the Microstructure of Ni-Based Metal Matrix Composites Submitted to Long Thermal Exposure -- Development and Properties of Cast TiAl Matrix In Situ Composites Reinforced with Carbide Particles -- Mechanical Properties of Interface Layers in SiC/TiAl Composite -- Chapter 5: Other Non-Ferrous Alloys Matrix Composites -- Study of the Mechanical Properties of the Copper Matrix Composites (CMCs): A Review -- Processing of Alumina Reinforced Copper Metal Matrix Composite by Selective Laser Melting Technology -- Improvement of Mechanical Properties of Cu/Graphene Composite by In Site Reduction and Matrix Alloying with Titanium -- Influence of Sic and Al₂O₃ Particulate Reinforcement on the Mechanical Properties of ZA27 Metal Matrix Composites -- Manufacture of Continuous Metal Matrix Composite Strip Reinforced by Particulate Materials from the Semisolid Processing -- Development of Bronze Metal Matrix Composite for Automobile and Marine Applications -- High-Speed Laser Melt Injection of Tungsten Carbide in Highly Conductive Copper Alloys -- Wear Resistance of Hard Particle Reinforced Copper Alloys Generated by Laser Melt Injection -- Chapter 6: Graded Composites -- Cladding of Stellite-6/WC Composites Coatings by Laser Metal Deposition -- Further Development of Process Maps for TRIP Matrix Composites during Powder Forging -- Influence of the Process Parameters on the Penetration Depth of the Reinforcing Phase during Composite Peening for the Production of Functionally Graded Metal Matrix Composites -- Empirical Model for Dry Sliding Wear Behaviour of Centrifugally Cast Functionally Graded Al/SiCp Composite -- Chapter 7: Surface, Thermal and Thermo-Mechanical Treatments of Metal Matrix Composites -- Enhanced Corrosion Resistance of SiCp/ 2009 Al by Cerium and Lanthanum Conversion Treatment.

AlSi-SiC Composites for Automotive Brake Rotor -- Foaming and Compressive Properties of A359/SiCp Metal Matrix Composites -- A Study on Particle Weight Fraction and Extrusion on the Mechanical Properties and Microstructural Evaluation of Al-Cu/Fly Ash Composite -- Effect of Carbon Nanotubes Addition on the Formability of Al-CNT Composite -- Stir Casting and Successive Rolling of Aluminium Alloy 2218 MMCs Reinforced by High-Entropy Alloy Particles -- Thermo-Mechanical Treatment of Titanium Based Layered Structures Fabricated by Blended Elemental Powder Metallurgy -- Cold Sprayed Additive Manufacturing of SiC/Al Metal Matrix Composite: Synthesis, Microstructure, Heat Treatment and Tensile Properties -- Chapter 8: Machining and Joining of Metal Matrix Composites -- Experimental Investigation during Micro-Milling of Hybrid Al6063 MMC Reinforced with SiC and ZrO₂ -- Investigation of Flux-Less Soldering of Metal Matrix Composite and Ceramics by Use of Zn Solder -- Study of Machining Parameter Optimization in Drilling of Magnesium Based Hybrid Composites Reinforced with SiC/CNT -- Reinforcement and Cutting Tools Interaction during MMC Machining - A Review -- Study on Surface Roughness in Minimum Quantity Lubrication Turning of Al-6082/SiC Metal Matrix Composites -- Energy Consumption Prediction Model of SiCp/Al Composite in Grinding Based on PSO-BP Neural Network -- Studies on Dissimilar Friction Stir Welded Al-4Cu-TiB₂ In Situ Composites with Base Alloy -- Investigation on Machining of

Hybrid Metal Matrix Composite -- WEDM Parametric Study on
Machining Responses of AA-6082/MoS₂/Al₂O₃ HMMCs -- WEDM
Machining Performance of Al Based Metal Matrix Composites
Reinforced with Rice Husk Ash -- Keyword Index -- Author Index.
