

1. Record Nr.	UNINA9911007170303321
Autore	Cortiços Nuno Dinis Costa Areias
Titolo	Green and Advanced Building Materials and Structural Engineering
Pubbl/distr/stampa	Zurich : , : Trans Tech Publications, Limited, , 2023 ©2023
ISBN	3-0364-1485-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (156 pages)
Altri autori (Persone)	LiZongjin MendoncaPaulo HongSoon Hyung TsukamotoHideaki ZhaoYuyuan
Disciplina	620.11
Soggetti	Sustainable construction Building materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Green and Advanced Building Materials and Structural Engineering -- Preface -- Table of Contents -- Chapter 1: Green Building Materials -- Evaluation of the Thermomechanical Response of Geopolymeric Mortars Manufactured from Peruvian Mining Residues and its Comparison with Portland Cement Mortars -- X-Ray Diffraction Comparison Study of Binders Derived from Pure C3S and Portland Cement Paste -- Performance of Metakaolin-Based Geopolymer Incorporating Recycled Plastic Aggregate -- Mechanical Evaluation of Geopolymer Mortars Derived from Gold Mining Tailings under Differents Atmospheres -- Development of Ultra-High Performance Geopolymer Concrete Containing Recycled Fine Aggregate Replacement -- Effect of Ground Granulated Blast-Furnace Slag on the Bond Strength of Recycled Aggregate Concrete -- Crumb Rubber in Alkaline Activated Clay Roof Tiles at Low Temperature -- Tensile Strength Determination for Rice Husk Ash and Corn Cob Ash Blended Cement Concrete -- Effectiveness of Carbide Lime Waste as CO2 Capturing Materials of Mortar at Early CO2 Curing Age -- Chapter 2: Advanced Building Materials -- Impacts of Abnormal Nanoindentation Points on

Micromechanical Properties and Content of Phase in Hydrated Cement Paste -- ETFE Characteristics in Architecture: The Case of Large-Scale Construction Project -- Research on the Proportion and Strength of Joint Filler Materials for External Wall Tiles -- Chapter 3: Applied and Structural Mechanics -- Adaptational Response of Individual Trabeculae Morphology to Loading at Different Directions -- Static and Fatigue Mechanical Properties of Polymer Matrix Composite Rods -- Application of a Custom Fe Simulation Technique for the Analysis of Hybrid Double-Cover Butt Joints -- Damage Localization in Plate Structures Based on Baseline-Free Method of Lamb Wave Using Mobile Transducer Set. Continuum Mechanics Models for Describing the Creep and Physical Aging Behaviors of Laminated Composites -- Chapter 4: Materials and Structures in Geotechnical Engineering -- Basic Study on Applicability to Artificial Barriers for Radioactive Waste Disposal Facility for Various Zeolites -- Functionally Graded Concrete: Structural Design and Effect on Sustainability Parameters -- Effect of Grain Size Distribution on Shear Strength Characteristic of Random Fill Material at Keureuto Dam, Indonesia -- Keyword Index -- Author Index.

Sommario/riassunto

Special topic volume with invited peer-reviewed papers only.
