

1. Record Nr.	UNINA9911007187803321
Autore	Ionescu Mihail
Titolo	Metallurgy of Steel
Pubbl/distr/stampa	Zurich : , : Trans Tech Publications, Limited, , 2023 ©2023
ISBN	3-0364-1112-7
Edizione	[1st ed.]
Descrizione fisica	1 online resource (232 pages)
Altri autori (Persone)	ChandraTara SommitschChristof ShabadiRaj
Disciplina	669.142
Soggetti	Metallurgy Steel
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Metallurgy of Steel -- Preface -- Table of Contents -- The Application of Physical Simulation in Hot and Cold Rolling of Steels -- Development and Application of a Thermal Microstructure Model of Laminar Cooling of an API X70 Microalloyed Steel -- Characterization and Separation of Damage Mechanisms of Extruded Case-Hardening Steel AISI 5115 under Cyclic Axial-Torsional Loading -- Effect of Mo and Mo+Nb Additions on the Phase Transformation and Microstructure of a Developed Low-Carbon CrNiMnB Ultrahigh-Strength Steels with a Preceding Hot Deformation -- Effect of Rapid Induction Tempering on the Mechanical Properties and Microstructure of Ultra-High Strength Steel -- Effect of Nitrogen Impurity on the Tensile Ductility and Impact Toughness of Al-Bearing DQP Steels -- Microstructural Characteristics and Mechanical Properties of Nanostructured Bainite Processed through High and Low Temperature Ausforming and Isothermal Holding near Ms in a Medium Carbon Steel -- Assessment of Mechanical Properties and Microstructure of EUROFER97 Steel after Thermo-Mechanical Treatments -- Impact of Ultra-Flash Tempering Treatment on the Microstructure and Mechanical Properties of High-Strength Carbon Steel -- Phenomenon-Based Model for Virtual Hot Strip Rolling -- Hot Stamping of Heavy-Gaged - Full Development and the Effect of Press

Hardening Process on the Microstructure and Mechanical Properties of 22MnB5 + NbMo Alloyed -- Grain Refinement in 441 Ferritic Stainless Steel: High Versus Low Ti/Al Ratio after Casting and Hot Rolling -- Back-Annealing of Hot Dip Galvanised Strip Steel Microalloyed with Vanadium -- Comparative Study of Quench and Partition Processes in High Si and High Al Steels -- Thermomechanical Processing of V-N Structural Plate Steels in Low Temperature Austenite.

Influence of Hot Rolling Practice and Furnace Residence Time on the Strength and Toughness of Normalised Nb-Ti-V Structural Steel Plate -- Medium Carbon Q& P Steel with High Product of Strength and Elongation -- Delamination Fracture in a Medium-Carbon Low-Alloy Steel Subjected to Tempforming -- Effects of Pre-Strain and Tempering on Mechanical Properties in High-Strength Martensitic Steels -- Effect of Pressure on High-Temperature Oxidation of Ferritic Stainless Steels -- Tribological Behaviour of Low Temperature Plasma Assisted Carburized 316 L Steel Produced by L-PBF Technique -- Recent Development of Hot-Rolled AHSS for Lightweight Chassis -- Effect of Thermomechanical Rolling on Mechanical Properties of TRIP-Aided Steel Sheet -- Prediction of TTR Diagrams via Physically Based Creep Simulations of Martensitic 9-12% Cr-Steels -- Influence of the Holding Thickness and Process in the Microstructure and Mechanical Properties of a Microalloyed 380 MPa Structural Steel -- Application of CALPHAD for the Prediction of Matrix Phase Transformations in Steel -- Towards High Strength-Ductility Balance Using Double Annealing Cycles -- Quench and Bainite (Q& B) Thermal Cycle as an Alternative to Standard Quench and Partitioning (Q& P) Annealing to Produce AHSS -- Importance of through Hardening of Low-Alloy High Performance Martensitic Steels for Large Section Applications -- Effects of Substrate Microstructure and Chemical Composition on Liquid Metal Embrittlement in Galvanized 3rd Generation AHSS -- Double Soaking of Medium Manganese Steels -- On High Performance Steels for Fasteners -- Design and Properties of Hot Rolled Tough Carbide Free Bainitic Steels -- Low Temperature Hot Press Forming of a Zinc Coated Third Generation Advanced High Strength Steel -- Keyword Index -- Author Index.

---

Sommario/riassunto

Special topic volume with invited peer-reviewed papers only.
