

1. Record Nr.	UNINA9911007199003321
Autore	Brennan David
Titolo	Process Industry Economics: Principles, Concepts and Applications
Pubbl/distr/stampa	Elsevier Amsterdam : , : Elsevier, , 2020
ISBN	0-12-819560-6 0-12-819466-9
Edizione	[2nd ed.]
Descrizione fisica	1 online resource
Disciplina	338.4766
Soggetti	Chemical engineering Costs, Industrial Manufacturing processes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	Process Industry Economics: Principles, Concepts and Applications, Second Edition, explores the fundamentals of market evaluation, capital and operating cost estimation, and profitability evaluation, along with their implications for process technology evaluation, project development and investment decisions. Sections cover time dependent technology evolution in process plants, including scale development, performance improvement in new and operating plants, and learning related to environmental, safety and sustainability assessments. Influences on capital investment decisions, including capacity planning and environmental considerations are explored and supported by case studies. Finally, the aspects of overall industry performance and drivers are discussed.
