

1. Record Nr.	UNINA9910953618003321
Titolo	Democratic representation in Europe : diversity, change, and convergence // edited by Maurizio Cotta and Heinrich Best
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2007
ISBN	1-383-03684-5 1-281-19051-9 9786611190514 0-19-152853-6 1-4356-2216-2
Descrizione fisica	1 online resource (552 p.)
Collana	Comparative politics
Altri autori (Persone)	CottaMaurizio <1947-> BestHeinrich
Disciplina	328.4/07334
Soggetti	Representative government and representation - European Union countries Democracy - European Union countries Europe Politics and government 1989-
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"ECPR."
Nota di bibliografia	Includes bibliographical references (p. [483]-508) and index.
Nota di contenuto	Contents; List of Figures; List of Tables; Notes on Contributors; Preface; 1. Parliamentary Representatives from Early Democratization to the Age of Consolidated Democracy: National Variations and International Convergence in a Long-term Perspective; Part I. Dimensions of Variation; Part II. Variations across Party Families; Part III. Comprehensive Analyses; References; Index
Sommario/riassunto	This title encourages a better understanding of relations between social and political change, and the importance of institutional factors in shaping the political elites of European democracies.

2. Record Nr.	UNINA9911007215803321
Autore	White Christopher
Titolo	Service Life Prediction of Polymers and Coatings : Enhanced Methods / White, Christopher [and others]
Pubbl/distr/stampa	Chantilly, VA, USA, : William Andrew, 2020
ISBN	9780128183670 0128183675
Descrizione fisica	1 online resource
Collana	Plastics design library
Altri autori (Persone)	NicholsMark PickettJames
Soggetti	Polymers Coatings
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	Service Life Prediction of Polymers and Coatings: Enhanced Methods focuses on the cutting-edge science behind how plastic and polymer materials are modified by the effects of weathering, offering the latest advances in service life prediction methods. The chapters have been developed by experts based on their contributions as part of the 7th Service Life Prediction Meeting. The volume begins with the premise that it is possible to produce and design life predictions, also looking at how these predictions can be used. Subsequent chapters present new developments in service life prediction, examining the most important considerations in SLP design, timescales, and other major issues. The book also considers the current state of the field in terms of both accomplishments and areas that require significant research going forward. This is a highly valuable reference for engineers, designers, technicians, scientists and R&D professionals who are looking to develop materials, components or products for outdoor applications across a range of industries. The book also supports academic researchers, scientists and advanced students with an interest in service life, the effects of weathering, material degradation, failure analysis, or sustainability across the fields of plastics engineering,
