

1. Record Nr.	UNINA9911007278703321
Autore	Nugroho Agustinus Agung
Titolo	Composites and Functional Materials
Pubbl/distr/stampa	Zurich : , : Trans Tech Publications, Limited, , 2023 ©2023
ISBN	9783036413631 3036413634
Edizione	[1st ed.]
Descrizione fisica	1 online resource (148 pages)
Altri autori (Persone)	UmemuraKazuo
Disciplina	620.118
Soggetti	Composite materials Materials science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Composites and Functional Materials -- Preface -- Table of Contents -- Chapter 1: Composite Materials -- A Machine Learning Model for Flaw Identification in Fibre-Reinforced Composites -- Mechanical and Thermal Analysis of Nito Fiber Reinforced Composites -- Asymmetric Four Point Bend Test Method for Interlaminar Shear Strength in Ceramic Matrix Composites -- Effects of Irradiation Dose of Sheet-Like Electron Beam and its Cathode Voltage on Impact Strength of Carbon Fiber Reinforced Thermoplastic Polyamide just before Shipping -- Microscopic Formation Mechanism and Physical Properties of Mo/Cu Composites with High Densification -- Handling Composites at Aircraft Accident Sites: An Evaluation of the Fracture Features in Burnt CFRP after the Application of a Fixant Solution -- A Review of Biodegradable Polymer Blends and Polymer Composite for Flexible Food Packaging Application -- Chapter 2: Zirconia and Zirconia-Based Composites -- The Effect of Zirconia Content on Physical and Mechanical Properties of Al <sub>2</sub> O <sub>3</sub> /ZrO <sub>2</sub> Composites -- Temperature and Molarity Effects on the Synthesized Zircon Crystal Cells -- The Conductivity of PANI/Zirconia Composites: Effect of Amorphous and Crystalline Fillers -- Structural and Thermal Analysis of CaCO <sub>3</sub> /ZrO <sub>2</sub> Composites -- Chapter 3: Carbon-Based Materials -- Interaction of Hydrogen with Reduced Graphene Oxide Probed by Muon-Spin

Relaxation Technique -- Disorder - Induced Characteristics Based on Optical Absorption of SiO<sub>2</sub>/rGO-Like Carbon Films -- Mechanical-Thermal Stability of Micro Composite Based Porous Carbon from Coconut Shell (Cocoa nucifera) Charcoal -- Optical Absorbance of Graphenic Carbon from Coconut Shells in Different Solvents for Film Preparation -- N-Doped Graphenic Carbon Derived from Coconut Shell as n-Type Semiconducting Layer. Study on Optical Energy Gap and the Thickness of Boron Doped Graphenic Carbon (B-GC) Film Prepared by Nanospray Method -- Probing the Magnetic Properties of Boron-Doped Graphenic-Based Carbon Materials -- Chapter 4: Functional Materials and Semiconductor Structures -- Measuring the Capacity of a Proposed Vibration Isolator Using Auxetics Sheets -- Comparison of Carrier Deflection between MAG-TFET and MAG-FinFET -- Keyword Index -- Author Index.

Sommario/riassunto

Special topic volume with invited peer-reviewed papers only.
