

1. Record Nr.	UNINA9910704068503321
Autore	Carswell William J.
Titolo	The 3D Elevation Program: summary for Kansas / / by William J. Carswell, Jr
Pubbl/distr/stampa	Reston, VA : , : U.S. Department of the Interior, U.S. Geological Survey, , 2014
Descrizione fisica	1 online resource (2 unnumbered pages) : color maps
Collana	Fact sheet, , 2327-6932 ; ; 2014-3106
Soggetti	Digital elevation models - Kansas Three-dimensional imaging - Kansas
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"November 2014."
Nota di bibliografia	Includes bibliographical references (page 2).

2. Record Nr.	UNINA9911007288703321
Autore	Federation Water Environment
Titolo	Solids Process Design and Management, 2nd Edition
Pubbl/distr/stampa	Chicago : , : Water Environment Federation, , 2023 ©2023
ISBN	9781523155705 1523155701 9781572784482 1572784482
Edizione	[1st ed.]
Descrizione fisica	1 online resource (993 pages)
Disciplina	628
Soggetti	Sewage--Purification Sewage disposal plants Management Sewage sludge
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Title Page -- Copyright -- Contents -- List of Figures -- List of Tables -- Preface -- Chapter 1 Introduction -- 1.0 Background -- 2.0 Scope and Process -- 3.0 References -- Chapter 2 Considerations for Planning of Biosolids Management Projects -- 1.0 Introduction -- 2.0 Federal and State Regulations -- 2.1 Background -- 2.2 Part 503 Standards-Class A and Class B Biosolids -- 2.3 Pathogen Reduction -- 2.3.1 Pathogen Reduction to Achieve Class A -- 2.3.2 Pathogen Reduction to Achieve Class B -- 2.4 Vector Attraction Reduction -- 2.5 Numeric Limits for Metals -- 2.6 State Regulations -- 3.0 Basis for a Biosolids Management Plan -- 4.0 Project Financing -- 5.0 The Planning Effort -- 6.0 Required Permits and Applicable Building Codes -- 7.0 Emerging Issues -- 8.0 Environmental Management Systems -- 8.1 The Challenges -- 8.2 Management Overview (or Ensuring Management Support) -- 8.2.1 Management Policy and Support -- 8.2.2 Goals and Objectives for Continual Improvement -- 8.2.3 Roles and Responsibilities -- 8.2.4 Management Review -- 8.3 Quality Management Practices -- 8.3.1 Best Management Practice Guidelines -- 8.3.2 Safe Practices Manual Guidelines -- 8.3.3 Environmental

Aspects and Critical Control Points -- 8.3.4 Operational Controls --  
 8.3.5 Monitoring and Measurement -- 8.3.6 Documentation and  
 Recordkeeping -- 8.3.7 Auditing, Nonconformance, Preventive and  
 Corrective Action -- 8.3.8 Emergency Preparedness and Response --  
 8.4 Relationships With Interested Parties -- 8.4.1 Public Participation --  
 8.4.2 Communication and Outreach (Internal, External, Regulatory) --  
 8.4.3 Training -- 8.4.4 Regulatory Compliance/Legal Requirements --  
 9.0 References -- 10.0 Suggested Readings -- Chapter 3 Public  
 Outreach and Involvement -- 1.0 Introduction -- 2.0 Public Outreach  
 and Involvement Basics -- 2.1 When Is Public Outreach and  
 Involvement Needed? -- 2.2 Siting a Biosolids Program and Community Acceptance -- 2.3  
 Managing Public Involvement -- 2.4 Responsibility to Protect the  
 Public's Investment -- 2.5 Time and Money Commitments for Public  
 Outreach and Involvement -- 2.6 Extent of Public Outreach and  
 Involvement -- 2.7 Benefits of Public Outreach and Involvement -- 2.8  
 Risk Assessment and Risk Perception -- 2.9 Risk Communication --  
 2.10 Building Trust -- 3.0 Action Items for Effective Public Outreach  
 and Involvement -- 3.1 Consult Available Resources -- 3.2 Start Public  
 Outreach and Involvement Right Away -- Case Study: Siting a Biosolids  
 Composting Facility -- 3.3 Ensure That the Project Team Is Committed  
 to the Process -- 3.4 Identify Stakeholders -- 3.5 Listening to Learn  
 from Stakeholders and the Community -- 3.5.1 Mental Models  
 (Focused Interviews or Dialogue Method) -- 3.5.2 Focus Groups --  
 3.5.3 Opinion Polling -- 3.5.4 Informal Methods for Listening and  
 Learning -- 3.6 Continue Public Outreach and Involvement -- 3.7  
 Communicating -- 3.8 Quality -- 3.9 Independent Evaluation and  
 Monitoring -- 3.10 Evaluating a Public Outreach and Involvement  
 Program -- Case Study: Denver's Biosolids Land Application Program --  
 4.0 Special Circumstances -- 4.1 Public Outreach and Involvement in  
 Ongoing Operations -- 4.2 Public Reactions to Odors -- 4.3 Working  
 With the Media -- 4.4 Crisis Communications -- 4.5 Working With  
 Elected Officials -- 4.6 Dealing With Dedicated Opponents and Other  
 Agendas -- 4.7 Public Outreach and Involvement Is Part of a Strong  
 Legal Defense -- 4.8 Conclusion: Building Relationships for the Long  
 Term -- 5.0 References -- 6.0 Suggested Readings -- Chapter 4 Solids  
 Production and Characterization -- 1.0 Introduction -- 2.0 Sources of  
 Solids in Wastewater Treatment -- 2.1 Preliminary Treatment -- 2.2  
 Primary Treatment -- 2.3 Secondary Treatment -- 2.4 Tertiary  
 Treatment -- 2.5 Scum and Grease -- 3.0 Typical Analyses for Wastewater Solids --  
 3.1 Sampling -- 3.1.1 Methods -- 3.1.2 Potential Biases and Errors in  
 Biosolids Sampling -- 3.2 Constituents Found in Solids -- 3.3 Methods  
 of Analysis -- 3.4 Physical Properties -- 3.5 Biological Properties -- 3.6  
 Chemical Properties -- 3.7 Additional Analytical Considerations --  
 3.7.1 Pollutant Limits -- 3.7.2 Microconstituents -- 4.0 Typical Solids  
 Characteristics -- 4.1 Preliminary Treatment -- 4.2 Primary Treatment  
 -- 4.3 Secondary Treatment -- 4.3.1 Conventional Activated Sludge --  
 4.3.2 Extended Air/Oxidation Ditch -- 4.3.3 Biological Nutrient  
 Removal -- 4.3.4 Fixed-Film/Hybrid Processes -- 4.3.5 Membrane  
 Bioreactors -- 4.3.6 Tertiary Treatment -- 5.0 Estimation of  
 Wastewater Solids Quantities -- 5.1 Criteria Used for Solids Processing  
 Design -- 5.1.1 Annual Average -- 5.1.2 Maximum Month -- 5.1.3  
 Peak Week -- 5.1.4 Peak Day -- 5.1.5 Hours of Operation -- 5.2  
 Typical Quantities of Solids -- 5.3 Methods for Estimating Solids  
 Quantities -- 5.3.1 Overview -- 5.3.2 Analysis of Historical Data --  
 5.3.3 Empirical Sludge Estimation Techniques -- 5.3.4 Theoretical  
 Model-Based Estimation -- 5.3.4.1 Influent Wastewater Characteristics

-- 5.3.4.2 Primary -- 5.3.4.3 Biological -- 5.3.5 Comprehensive Simulation Models -- 5.3.6 Additional Factors Affecting Sludge Production -- 6.0 References -- 7.0 Suggested Reading -- Chapter 5 Design Approach -- 1.0 Introduction -- 2.0 Design Project Phases -- 2.1 Small Design Projects -- 2.2 Large Design Projects -- 2.3 Typical Phases of a Design Project -- 2.4 Design Processes and Activities -- 2.5 Required Design Processes -- 3.0 Process Selection -- 3.1 Relevant Criteria for Solids Process Selection -- 3.2 Identification of System Options -- 3.3 Biosolids Process Selection-Evaluation -- 3.3.1 Developing Alternatives -- 3.3.2 Screening Alternatives. 3.3.3 Collecting Meaningful, Reliable Data -- 3.3.4 Evaluating Screened Alternatives -- 3.3.5 Developing Plan to Proceed With Selected Alternative -- 4.0 Mass Balances and Process Schematics -- 4.1 Mass Balance Approach to Solids Processing -- 4.1.1 Generation of Wastewater Treatment Residuals -- 4.1.2 Interfaces Between Biosolids Handling and Treatment -- 4.2 Process Schematic Approach -- 4.2.1 Example 1-Secondary Treatment With Activated Sludge, Dewatering of Waste Activated Sludge, and Landfilling of Raw Solids -- 4.2.2 Example 2-Primary Clarification with Activated Sludge, Thickening of Waste Activated Sludge, Anaerobic Digestion, and Land Application of Digested Biosolids -- 4.2.3 Example 3-Oxidation Ditch, Aerobic Digestion, Dewatering, and Land Application of Class B, Cake Biosolids -- 5.0 Equipment Selection and Sizing -- 5.1 Evaluating Equipment -- 5.2 Integration of Equipment Into Selected Process -- 5.3 Specifying Equipment Features and Options -- 5.4 Established, Innovative, and Embryonic Equipment -- 6.0 Contingency Planning -- 6.1 Designing for Emergency Conditions -- 6.2 Process and Equipment Redundancy -- 6.3 Developing a Contingency Plan -- 7.0 Other Design Considerations -- 7.1 Site Variations -- 7.2 Energy Conservation and Recovery -- 7.3 Cost-Effective Analyses -- 7.4 Design Checklists -- 8.0 References -- 9.0 Suggested Readings -- Chapter 6 Conveyance of Wastewater Residuals -- 1.0 Introduction -- 2.0 Pumping and Pipelines -- 2.1 Sources and Properties of Residuals -- 2.2 Application of Rheology to Sludge Pumping Problems -- 2.3 Head Loss Calculations for Pumping of Non-Newtonian Sludges -- 2.3.1 Introduction -- 2.3.2 Head Losses From Pumping Dilute Residuals -- 2.3.3 Head Losses From Pumping Thickened Residuals -- 2.3.3.1 Simplified Head Loss Calculations -- 2.3.3.2 Using Known Equations for Water. 2.3.3.3 Using Yield Stress and Coefficient of Rigidity -- 2.3.3.4 Obtaining the System Properties -- 2.3.3.5 Laminar Flow -- 2.3.3.6 Laminar, Transition, and Turbulent Flow -- 2.3.3.7 Field Pumping Studies and Long-Distance Pumping -- 2.3.3.8 Solved Example 1: Laminar Flow -- 2.3.3.9 Solved Example 2: Transition/Turbulent Flow -- 2.3.3.10 Solved Example 3: Laminar and Turbulent Flow -- 2.3.4 Head Losses From Pumping Dewatered Residuals -- 2.4 Overview of Residuals Pumping Equipment -- 2.5 Application of Sludge Pumps -- 2.6 Pipe, Fittings, and Valves -- 2.7 Inline Grinding -- 2.8 Line Lubrication -- 2.9 Experience and Design Guidelines for Long-Distance Pumping of Liquid Residuals -- 2.9.1 Experience -- 2.9.2 Design Guidance -- 2.10 Case Studies of Dewatered Cake Pumping -- 3.0 Conveyor Systems -- 4.0 Overview of Design and Control Considerations for Residuals Conveyance Systems -- 5.0 Odors -- 6.0 References -- Chapter 7 Chemical Conditioning -- 1.0 Introduction -- 2.0 Types of Water in Biosolids -- 2.1 Free Water -- 2.2 Bound Water -- 2.3 Vicinal Water -- 2.4 Interstitial Water -- 2.5 Capillary Water -- 2.6 Removing Water From Biosolids -- 3.0 Factors Affecting Conditioning -- 3.1 Residuals Characteristics -- 3.1.1 Source of Residuals -- 3.1.2 Solids Concentration -- 3.1.3 Alkalinity and pH --

3.1.4 Extracellular Polymeric Substances -- 3.1.5 Particle Size and Distribution -- 3.1.6 Degree of Hydration -- 3.1.7 Particle Surface Charge -- 3.1.8 Wastewater Cations -- 3.1.9 Rheology -- 3.2 Inorganic Chemical Addition -- 3.2.1 Ferric Chloride and Alum -- 3.2.2 Struvite Control -- 3.3 Handling and Processing Conditions Before Conditioning -- 3.3.1 Storage -- 3.3.2 Pumping -- 3.3.3 Mixing -- 3.4 Ultimate Disposal or Use of Solids -- 4.0 Types of Chemical Conditioning -- 4.1 Inorganic Chemicals -- 4.1.1 Lime and Its Characteristics -- 4.1.2 Ferric Salts.  
4.1.3 Ferric Salts with Lime.

---

## Sommario/riassunto

The second edition of this publication is intended for use by professionals engaged in the design, approval, and operation of municipal solids treatment and disposal systems in utilities of all sizes. It includes updated information to accounting for the recent changes and improvements in technology and regulatory environment policies. Chapters include updated solids incineration, dewatering information improvements, updates to solar drying information, regulatory environmental policies, utility management, technological advancements, planning, public outreach and involvement, solids production and characterization, design approach, conveyance, conditioning, thickening, waste minimization, anaerobic and aerobic digestion, composting, alkaline treatment, disinfection and stabilization, thermal drying, thermal oxidation, pyrolysis and gasification, transport and storage, odor management, side streams, instrumentation and monitoring, land application and product distribution, landfill management, emerging technologies, and treatment and utilization of green gases.
