Sommario/riassunto	This book presents an examination of the relationship between finance, investment, and digital transformation in the context of Asian business

environment. It offers a comprehensive and in-depth exploration of these critical themes, providing a foundation for a profound understanding of the evolving digital business ecosystem. Grounded in research, this work offers a wealth of practical insights and draws on empirical evidence from real-world case studies involving Asian startups. It equips readers with actionable knowledge, making it an invaluable resource for researchers, academics, and professionals seeking to navigate the complex landscape of digital finance. The book delves into topics such as application of AI in investment, finance, and its trustworthiness, the impact of digital cashless payments , and the role of academics in building the future of finance. Additionally, it explores the cooperative approach to fintech development, the future structure of banking in the digital age, and navigating the digital frontier: Central Bank Digital Currencies . With a forward-looking perspective, the book examines emerging trends and technological advancements that will reshape the financial services industry. It scrutinizes the impact of AI and deep learning-based business models, the empowerment potential of digital microfinance, and regulation and taxation of crypto income within Asian markets. It offers a solid foundation for those seeking to make informed decisions and conduct rigorous research in this rapidly evolving field.
