Autore	Donaldson Cam
Titolo	Financing Health and Social Care : Bringing Health Economics Back into Public Policy // by Cam Donaldson
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Palgrave Macmillan, , 2025
ISBN	3-031-86769-6
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (XVII, 118 p. 7 illus., 1 illus. in color.)
Collana	Economics and Finance Series
Disciplina	338.4761
Soggetti	Medical economics Finance, Public Economic policy Health services administration Public health administration Health Economics Public Economics Economic Policy Health Care Management Health Administration
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1. Whatever happened to health economics? -- Chapter 2. In place of fear, 2.0! The efficiency and fairness of free health care for all -- Chapter 3. Resurrecting demand-side socialism: marching 2x2 to health and social care reform -- Chapter 4. The fiscal management of health and social care -- Chapter 5. What do we do about doctors? Countervailing power (in)action -- Chapter 6. Economics and pandemics -- Chapter 7. Conclusion: the price of demand-side socialism in health and social care.
Sommario/riassunto	“Without doubt, the most important update to economic reasoning and evidence as to why our publicly funded health care systems need protection and expansion, even into areas such as social care.” —Craig Mitton, Professor in School of Population and Public Health, University of British Columbia “Leading world expert, and I don’t say that lightly.

Everyone should read the chapter on economics of pandemics.” —Bruce Hollingsworth, Professor of Health Economics, Lancaster University “A wonderful book. It should be read by economists, health ministers and their advisors across the globe.” —Susan Cleary, Professor of Health Economics, University of Cape Town

Why do most capitalist economies have socialist health care systems? How can we preserve them? What would Aneurin Bevan think? These are the three main questions addressed by this book. In the 1950s, through *In Place of Fear*, Bevan made a strong case for a National Health Service which he had been instrumental in establishing in the UK in 1948. But he did not articulate the accompanying economic case. That case is presented here in an accessible way and extended to social care. A comprehensive understanding of ‘tried and tested’ means of financing health care is presented, alongside assessments of repeated and new approaches proposed in policy circles as quick fixes to funding shortfalls. This is tackled across four themes: the role of the private sector; making choices in the face of resource scarcity; workforce planning and remuneration; and preparation for pandemics. The emerging proposals carry a cost to the public purse, but must be weighed against the costs and unfairness of further disintegration. With a special focus on the UK and the NHS at a critical time for policy change, this essential book provides the blueprint for policymakers, clinical leadership and politicians needing to pay more attention to the economic issues underlying health and social care as they shape *In Place of Fear 2.0*.

Cam Donaldson PhD FRSE is Emeritus Yunus Chair at Glasgow Caledonian University and Professor of Health Economics at Australian National University. .
