

1. Record Nr.	UNINA9911007370103321
Titolo	Catalytic hydrogenation / / editor, L. Cervený
Pubbl/distr/stampa	Amsterdam ; ; New York, : Elsevier New York, N.Y., U.S.A., : Distributors for the U.S. and Canada, Elsevier Science Pub. Co., 1986
ISBN	1-282-03492-8 9786612034923 0-08-096061-8
Descrizione fisica	1 online resource (705 p.)
Collana	Studies in surface science and catalysis ; ; v. 27
Altri autori (Persone)	CervenýL (Libor)
Disciplina	541.3/93
Soggetti	Hydrogenation Catalysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographies and index.
Nota di contenuto	pt. 1. Kinetics and mechanism of hydrogenation and hydrogenolytic reactions -- pt. 2. Heterogeneous hydrogenation catalysts. New aspects -- pt. 3. Advances in homogeneous hydrogenation -- pt. 4. Catalytic hydrogenation reactors and technologies.
Sommario/riassunto	The collection of contributions in this volume presents the most up-to-date findings in catalytic hydrogenation. The individual chapters have been written by 36 top specialists each of whom has achieved a remarkable depth of coverage when dealing with his particular topic. In addition to detailed treatment of the most recent problems connected with catalytic hydrogenations, the book also contains a number of previously unpublished results obtained either by the authors themselves or within the organizations to which they are affiliated. Because of its topical and original character, th

Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Vertical and Horizontal Beginnings -- Astronomy -- Geoscience -- Mathematics -- Physics -- Agriculture -- Biology.
Sommario/riassunto	A History of Chinese Science and Technology (Voulumes 1, 2 & 3) presents 44 individual lectures, beginning with Ancient Chinese Science and Technology in the Process of Human Civilizations and An Overview of Ancient Chinese Science and Technology, and continuing with in-depth discussions of several issues in the history of science and the Needham Puzzle, interspersed with topics on Astronomy, Arithmetic, Agriculture, and Medicine, The Four Great Inventions, and various technological areas closely related to clothing, food, shelter, and transportation. This book is the most authoritative work on the history of Chinese Science and Technology. It is the Winner of the China Book Award, the Shanghai Book Award (1st prize), and the China Classics International (State Administration of Press, Publication, Radio, Film and

Television of The People's Republic of China) and offers an essential resource for academic researchers and non-experts alike. It originated with a series of 44 lectures presented to top Chinese leaders, which received very positive feedback. Written by top Chinese scholars in their respective fields from the Institute for the History of Nature Sciences, Chinese Academic Sciences and many other respected Chinese organizations, the book is intended for scientists, researchers and postgraduate students working in the history of science, philosophy of science and technology, and related disciplines. Yongxiang Lu is a professor, former president and member of the Chinese Academy of Sciences.
