

1. Record Nr.	UNINA9911007374103321
Autore	Baca A. G
Titolo	Fabrication of GaAs devices / / by Albert G. Baca and Carol I.H. Ashby
Pubbl/distr/stampa	London, : Institution of Electrical Engineers, c2005
ISBN	1-282-26334-X 9786612263347 1-61583-323-4 1-84919-068-2
Descrizione fisica	1 online resource (370 p.)
Collana	Processing series ; ; no. 6
Altri autori (Persone)	AshbyCarol Iris Hill <1953->
Disciplina	620.1 620.1/93 620.193 621.38152
Soggetti	Electronics Gallium arsenide semiconductors
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	CONTENTS; Acknowledgment; Abbreviations; 1. Introduction to GaAs devices; 2. Semiconductor properties, growth, characterisation and processing techniques; 3. Cleaning and passivation of GaAs and related alloys; 4. Wet etching and photolithography of GaAs and related alloys; 5. Dry etching of GaAs and related alloys; 6. Ohmic contacts; 7. Schottky contacts; 8. Field effect transistors; 9. Heterojunction bipolar transistors; 10. Wet oxidation for optoelectronic and MIS GaAs devices; Glossary; Index
Sommario/riassunto	This book provides fundamental and practical information on all aspects of GaAs processing. The book also gives pragmatic advice on cleaning and passivation, wet and dry etching and photolithography, and dry etching.
