Function 3. The Governor Vessel

Sommario/riassunto

Traditional Chinese medicine has a complex history, yet the basic principles at the heart of practice have remained the same for hundreds of years. Without a solid understanding of these fundamental theories, effective practice is impossible. This book provides a complete introduction to everything that students and practitioners need to know.

Livello bibliografico	Monografia
Nota di contenuto	Introduction to Strategic International Management -- External Environment -- International Coordination -- Foreign Operation Modes -- Configuration of Value Chain Activities -- Selected International Business Functions.
Sommario/riassunto	A compact overview of the key concepts and main developments in International Management. Strategy concepts, models and theories of Multinational Corporations and their practical implementation are the core of this book. The authors explore the unique aspects of international value chain activities and business functions, offering a deep understanding of how areas like Production & Sourcing, Research & Development, Marketing, Human Resource Management, and Controlling are managed in international firms. In 25 chapters, each topic is explained with a comprehensive overview, followed by a case

study from a prominent international company to facilitate the understanding and application of the concepts. In this fourth edition, all chapters have been thoroughly updated to include new academic insights and recent developments. New chapters on MNCs from Emerging Markets and on Foreign Divestment have been added. Nearly all case studies have been replaced with new ones; the rest of them have been revised. Despite these updates, the proven core concept of the book remains unchanged. From the fourth edition, Benjamin Bader joins the author team. Contents Introduction to Strategic International Management External Environment International Coordination Foreign Operation Modes Configuration of Value Chain Activities Selected International Business Functions The Authors Dirk Morschett is Professor of International Management at the University of Fribourg, Switzerland. Hanna Schramm-Klein is Professor of Marketing and Retailing at the University of Siegen, Germany. Joachim Zentes is Professor emeritus of Management and Marketing at the Saarland University, Saarbrücken, Germany. Benjamin Bader is Professor of International Human Resource Management at Newcastle University, United Kingdom.
