

1. Record Nr.	UNINA9911007491103321
Titolo	Modelling and Mining Networks : 20th International Workshop, WAW 2025, Vilnius, Lithuania, June 30 – July 3, 2025, Proceedings // edited by Mindaugas Bloznelis, Paulius Drungilas, Bogumi Kamiski, Pawe Praat, Matas Šileikis, François Théberge, Rimantas Vaicekaskas
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2025
ISBN	3-031-92898-9
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (X, 205 p. 51 illus., 42 illus. in color.)
Collana	Lecture Notes in Computer Science, , 1611-3349 ; ; 15699
Disciplina	004.0151
Soggetti	Computer science Data structures (Computer science) Information theory Application software Computer science - Mathematics Discrete mathematics Theory of Computation Data Structures and Information Theory Computer and Information Systems Applications Discrete Mathematics in Computer Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	-- Linear Geometric Centralities. -- Analysis and predictability of centrality measures in competition networks. -- Modularity of Random Intersection Graphs. -- The size of the giant in inhomogeneous random graphs of preferential attachment type. -- k-connectivity threshold for superpositions of Bernoulli random graphs. -- Improving community detection via community association strength scores. -- PageRank under interpolation between undirected- and directed networks - a case study. -- Degrees in preferential attachment networks with an anomaly. -- The Artificial Benchmark for Community Detection with Outliers and Overlapping Communities (ABCD+o2). -- A Graph Network Approach to Disinformation Detection in Social Media.

-- Computation of the Laplacian Spectral Barycentre Network in a Soules Basis. -- The Multilayer Artificial Benchmark for Community Detection (mABCD). -- Integrating Link Prediction and Isolation Forest for Backbone Extraction.

Sommario/riassunto

This book constitutes the refereed proceedings of the 20th International Workshop on Modelling and Mining Networks, WAW 2025, held in Vilnius, Lithuania, during June 30–July 3, 2025. The 13 full papers presented in this book were carefully reviewed and selected from 20 submissions. The aim of the 20th Workshop on Modelling and Mining Networks was to further the understanding of networks that arise in theoretical as well as applied domains. The goal was also to stimulate the development of high performance and scalable algorithms that exploit these networks.
