Sommario/riassunto	In the early modern period, the culture of Rome, with Virgil as its greatest figure, was the model for emulation. The age of Louis XIV compared itself to the Augustan age, and Dryden hailed Virgil as 'my Divine Master.' But in 18th-century Europe, a general shift occurred in favor of Greece, a trend that was most pronounced in Germany. Winckelmann, the spokesman for philhellenism, extolled Greek art and dismissed all Roman art as derivative and Virgil as second rate and incapable of understanding true beauty. Yet he nonetheless remained indebted to Virgil for his view of Greek art, although he failed to recognize it. The export of Winckelmann's new view of Virgil and more generally Roman culture - shared to varying extents by Lessing, Herder, Goethe, and the brothers Schlegel - to the rest of Europe in the 19th century, particularly to the English-speaking world via Coleridge and Matthew Arnold] soon made it the reigning dogma: indeed it formed the point of departure for Virgil scholarship in the 20th century. This, however, did not prevent German poets from using Virgil, although neither they nor later scholars called attention to it. Virgil

became a repressed muse, and has a continued, unexamined presence in the epic and idyll of Klopstock, Wieland, Goethe, and Novalis. Geoffrey Atherton's comparative investigation of the relation of modernity to antiquity through Virgil and his twofold reception represents a new perspective on this issue. Geoffrey Atherton is assistant professor in the Department of German Studies at Connecticut College.

Sommario/riassunto

This anthology explores food and cultural heritage from various eras to show how food history helps us understand the past, present, and future. It provides new insight into local food cultures and focuses on the creative use of historical food culture for the future. The chapters cover new research on medieval food culture, starting with the Viking ship excavation at Gjellestad, which sheds light on early Norwegian fishing culture. Others address animal husbandry, cultivation, and food processing on medieval farms, and the dietary practices of monastic orders based on Cistercian rules. The history of beer brewing is also highlighted, along with the transition to traditional Nordic cooking after the Middle Ages, influenced by global food trade. Finally, the book discusses the radical changes in Norwegian food culture over the past hundred years, partly driven by developments in the restaurant industry.
