Sommario/riassunto	This sixth volume continues the journal's tradition of providing a wide range of scholarly studies, covering topics as diverse as Carolingian war-horse breeding, late-medieval Spanish methods of war-finance, the interface betweenmilitary action and politics at the end of the Hundred Years War, and the tactical methods of Cuman warriors. A key feature of the journal is its commitment to fostering debate on the most significant issues in medieval military history, and that tradition too continues with the new volume, with a study of the relationships between communal horsemen and footsoldiers in High Medieval Italy

having significant implications for the dispute over the importance of infantry before the 14th century.
