| Sommario/riassunto | This book, published by the Association of American Colleges and Universities, explores strategies for enhancing teaching and leadership skills in the context of STEM education. It addresses the challenges and responses related to leadership development, specifically focusing on advancing equity for STEM women faculty of color. Supported by the National Science Foundation, the book aims to provide insights and actionable steps for educators and administrators to foster inclusive and effective educational practices. The intended audience includes educators, policymakers, and academic leaders interested in diversity and equity in STEM fields. |
