Sommario/riassunto	Patton's Tactician, edited by James W. Holsinger Jr., delves into the historical contributions of Lieutenant General Geoffrey Keyes, a noteworthy figure in the US military during World War II. Through Keyes's war diary, this book offers an in-depth look at his role in significant military campaigns, such as Operation Torch, the Sicilian Campaign, and the liberation of Rome. The volume captures Keyes's strategic insights and leadership qualities, providing a comprehensive understanding of his impact on military operations. It also addresses the broader context of the US armed forces' role during the war and

post-war occupation of Germany and Austria. The book is intended for military historians, scholars, and readers interested in World War II history, with a note on the unedited historical language used in the diary.
