

1. Record Nr.	UNINA9911009160603321
Autore	IAEA
Titolo	Monitoring Stable Nitrogen and Oxygen Isotope Compositions of Nitrate in Atmospheric Precipitation : Final Report of a Coordinated Research Project
Pubbl/distr/stampa	Vienna : , : International Atomic Energy Agency, , 2024 ©2024
ISBN	9789201161246 9789201160249
Edizione	[1st ed.]
Descrizione fisica	1 online resource (46 pages)
Collana	IAEA TECDOC Series No Series ; ; v.2050
Soggetti	Data encryption (Computer science) Cryptography
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Blank Page.
Sommario/riassunto	This book appears to be a technical manual or guide focusing on the implementation and usage of the AES (Advanced Encryption Standard) algorithm, a widely-used method for securing digital information. The mention of 'PyCryptodome' suggests that the text includes instructions or discussions related to cryptographic libraries in Python, which are essential for developers and professionals working with data encryption. The book likely aims to provide practical guidance, troubleshooting tips, and solutions for common issues encountered when implementing AES in software applications. It is intended for an audience of software developers, IT professionals, and cybersecurity experts who require a deeper understanding of data encryption techniques and their applications.
