Sommario/riassunto	Business executives and managers are increasingly working in a highly competitive environment, where identifying the main drivers of performance is vital for the survival of firms. Intellectual capital is a crucial matter for firms worldwide, and the disclosure of intellectual capital has been identified as one of the major drivers of performance. This book examines the impact of intellectual capital disclosure on the performance of listed firms which adopt the balanced scorecard approach. The book is a product of research that offers innovative analysis and proves that managers of firms can use the disclosure of intellectual capital to boost performance. It reveals how using the balanced scorecard as a measurement tool for intellectual capital disclosure can drive the performance of firms. Students in postgraduate programmes and academics, as well as business executives and managers, will find this book to be an essential guide to maximizing intellectual capital disclosure to boost performance.

Sommario/riassunto	"Je n'y arriverai jamais", "Je suis trop fatigué", "Ce n'est pas pour moi"... Personne ne peut contester que ces exemples sont des prophéties autoréalisatrices, et qu'elles entraînent échecs et ennuis, parce qu'on ne cesse de se les répéter. Ne tient-il donc pas qu'à vous de faire tout le contraire, et de vous débarrasser une fois pour toutes de l'auto-sabotage ? Le psychologue Emile Coué fut le tout premier à constater les vertus de l'autosuggestion consciente et à développer une méthode pour influencer favorablement notre inconscient par la suggestion. Sa méthode est aujourd'hui à la racine de la sophrologie et des courants de pensée positive. Voici comment se construire autrement pour retrouver confiance en soi et développer la meilleure des vertus, la maîtrise de soi-même.
