of National Courts -- Personal Data: Damages Actions between EU Competition Law and the GDPR.

Sommario/riassunto

This book examines the enforcement of EU competition law in the digital age, focusing on both public and private aspects. Edited by L. Calzolari, A. Miglio, C. Cellerino, F. Croci, and J. Alberti, it discusses how traditional competition law frameworks are adapting to challenges posed by big data and digital markets. Key topics include market power, data as a production input, algorithmic collusion, and the role of gatekeepers under the Digital Markets Act. The book also explores the intersection of competition law and data protection, particularly in light of the GDPR. Intended for legal professionals and scholars, it aims to enhance understanding of competition law in the digital context and is supported by the Training of National Judges Programme of the European Union.
