

1. Record Nr.	UNINA9911009250803321
Autore	Willatzen Morten
Titolo	Piezoelectricity in Classical and Modern Systems
Pubbl/distr/stampa	Bristol : , : Institute of Physics Publishing, , 2024 ©2024
ISBN	9780750355599 9780750355582
Edizione	[1st ed.]
Descrizione fisica	1 online resource (297 pages)
Collana	IOP Ebooks Series
Disciplina	537.2446
Soggetti	Strains and stresses Piezoelectricity
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Editor biographies -- Divya Tripathy -- Anjali Gupta -- List of contributors -- Chapter Microbial surfactants: overview -- 1.1 Introduction to microbial surfactants -- 1.2 Historical developments of microbial surfactants -- 1.3 Molecular structure of biosurfactants -- 1.3.1 Types of biosurfactants -- 1.3.2 Surface activity of biosurfactants -- 1.3.3 Micelle formation and critical micelle concentration (CMC) -- 1.3.4 Thermodynamic properties of biosurfactants -- 1.4 Biodegradation and environmental properties of biosurfactants -- 1.4.1 Sustainable production of biosurfactants -- 1.5 Application of biosurfactants -- 1.5.1 In cosmetic industry -- 1.5.2 In the pharmaceutical industry -- 1.5.3 In agriculture -- 1.5.4 In the food industry -- 1.5.5 Environmental application -- 1.5.6 Application of biosurfactants in bio-nanotechnology -- 1.5.7 Application of biosurfactants in the petroleum industry for oil recovery -- 1.5.8 General industrial applications -- 1.6 Challenges and limitations -- 1.7 Conclusions -- Abbreviations -- References -- Chapter Biosurfactants and bioemulsifiers: introduction, types, synthesis, properties and potential applications -- 2.1 Introduction to microbial surfactants -- 2.1.1 Brief history -- 2.2 Synthetic surfactants -- 2.3 Need for an alternative and safer substitute -- 2.4 Types of microbial surfactant -- 2.5 Biosurfactant -- 2.6 Properties of biosurfactants -- 2.6.1 Non-toxic

-- 2.6.2 Bio-degradable -- 2.6.3 Temperature, pH, and salinity stability -- 2.6.4 Surface and interface activity -- 2.6.5 Emulsification -- 2.6.6 Lower critical micelle concentrations (CMC) -- 2.6.7 Market potential of biosurfactants -- 2.6.8 Classification of biosurfactants -- 2.7 Bioemulsifiers -- 2.7.1 Lipopeptides -- 2.7.2 Phospholipids -- 2.8 Polymeric biosurfactants -- 2.9 Production and extraction of microbial surfactants.

2.10 Microorganisms used for surfactant production -- 2.11 Fermentation conditions for surfactant production -- 2.12 Downstream processing for surfactant extraction -- 2.12.1 Centrifugation or filtration -- 2.12.2 Extraction -- 2.12.3 Precipitation -- 2.12.4 Solvent recovery -- 2.12.5 Filtration and purification -- 2.12.6 Chromatography -- 2.12.7 Ultrafiltration or dialysis -- 2.12.8 Drying -- 2.12.9 Characterization and quality control -- 2.12.10 Packaging and storage -- 2.13 Applications of microbial surfactants -- 2.14 Enhanced oil recovery -- 2.15 Bioremediation -- 2.15.1 Biostimulation for petroleum bioremediation -- 2.15.2 Bioaugmentation for petroleum bioremediation -- 2.16 Medical application -- 2.17 Cosmetics and personal care -- 2.18 Agriculture -- 2.19 Food industry -- 2.20 Regulatory concerns -- 2.21 Conclusion -- References -- Chapter Producer microorganisms and the metabolic engineering for biosurfactant production -- 3.1 Microbial sources of surfactants: introduction -- 3.2 Bacteria as biosurfactant producers -- 3.2.1 Examples of bacterial genera and species that produce biosurfactants -- 3.2.2 Advantages and disadvantages of bacterial biosurfactant producers -- 3.3 Yeasts as biosurfactant producers -- 3.3.1 Examples of yeast genera and species that produce biosurfactants -- 3.3.2 Advantages and disadvantages of yeast biosurfactant producers -- 3.4 Fungi as biosurfactant producers -- 3.4.1 Examples of fungal genera and species that produce biosurfactants -- 3.4.2 Advantages and disadvantages of fungal biosurfactant producers -- 3.5 Metabolic engineering for biosurfactant production -- 3.5.1 Principles of metabolic engineering -- 3.5.2 Strategies for biosurfactant production using metabolic engineering -- 3.6 Advances in metabolic engineering for biosurfactant production -- 3.7 Conclusions -- References.

Chapter Kinetics of microbial growth and biosurfactant production -- 4.1 Kinetics of microbial growth -- 4.1.1 Growth curve phases -- 4.1.2 Factors affecting microbial growth -- 4.2 Kinetics of biosurfactant production -- 4.2.1 Biosurfactant production process -- 4.2.2 Biosurfactant production kinetics -- 4.2.3 Factors affecting biosurfactant production -- 4.3 Measurement of microbial growth and biosurfactant production -- 4.3.1 Optical density (OD) measurement -- 4.3.2 Colony count method -- 4.3.3 Dry weight measurement -- 4.3.4 Surface tension measurement -- 4.4 Application of microbial growth and biosurfactant production -- 4.4.1 Industrial application -- 4.4.2 Environmental applications -- 4.4.3 Medical and pharmaceutical applications -- 4.5 Conclusion -- References -- Chapter Bioreactors for biosurfactant production and downstream processing surfactant extraction -- 5.1 Introduction -- 5.1.1 Bioreactors for biosurfactant production -- 5.1.2 Downstream processing for surfactant extraction -- 5.2 Types of bioreactors for biosurfactant production -- 5.2.1 Stirred tank bioreactors -- 5.2.2 Application in biosurfactant production -- 5.2.3 Membrane bioreactors -- 5.2.4 Bubble column bioreactors -- 5.2.5 Packed bed bioreactors -- 5.3 Downstream processing for surfactant extraction -- 5.3.1 Centrifugation -- 5.3.2 Filtration -- 5.3.3 Precipitation -- 5.3.4 Extraction with solvents -- 5.4 Conclusion and future perspectives -- References -- Chapter Microbial surfactants from waste resources -- 6.1 Introduction -- 6.1.1

Importance of microbial surfactants -- 6.1.2 Sources of waste resources for microbial surfactants production -- 6.2 Microorganisms for microbial surfactants production from waste resources -- 6.2.1 Bacteria -- 6.2.2 Yeasts -- 6.3 Types of waste resources from microbial surfactants production -- 6.3.1 Agriculture waste. 6.3.2 Industrial waste -- 6.3.3 Municipal waste -- 6.4 Production and purification of microbial surfactants from waste resources -- 6.4.1 Production process -- 6.4.2 Purification process -- 6.5 Applications of microbial surfactants from waste resources -- 6.5.1 Bioremediation -- 6.5.2 Agriculture -- 6.5.3 Cosmetics and personal care products -- 6.5.4 Food industry -- 6.5.5 Pharmaceuticals -- 6.5.6 Enhanced oil recovery -- 6.6 Challenges and future prospects -- 6.6.1 Challenges -- 6.6.2 Scale-up -- 6.6.3 Future prospects -- 6.7 Conclusion -- References -- Chapter Microbial surfactants in soil remediation -- 7.1 Introduction -- 7.2 Mechanisms of soil remediation using microbial surfactants -- 7.2.1 Emulsification -- 7.2.2 Dispersion -- 7.2.3 Solubilization -- 7.2.4 Mobilization -- 7.3 Factors affecting the effectiveness of microbial surfactants in soil remediation -- 7.3.1 Contaminant type and concentration -- 7.3.2 Surfactant type and concentration -- 7.3.3 Soil characteristics -- 7.3.4 Microbial activity -- 7.3.5 Environmental conditions -- 7.3.6 Surfactant persistence -- 7.3.7 Surfactant toxicity -- 7.3.8 Hydraulic conditions -- 7.3.9 Regulatory and safety considerations -- 7.4 Applications of microbial surfactants in soil remediation -- 7.4.1 Bioremediation of hydrocarbons -- 7.4.2 Bioremediation of heavy metals -- 7.4.3 Bioremediation of pesticides -- 7.4.4 Bioremediation of explosives -- 7.5 Limitations of using microbial surfactants in soil remediation -- 7.6 Conclusion -- References -- Chapter Microbial surfactants in water remediation -- 8.1 Introduction -- 8.2 Mechanisms of water remediation using microbial surfactants -- 8.2.1 Emulsification -- 8.2.2 Dispersion -- 8.2.3 Solubilization -- 8.2.4 Mobilization -- 8.3 Factors affecting the effectiveness of microbial surfactants in water remediation -- 8.3.1 pH -- 8.3.2 Temperature. 8.3.3 Salinity -- 8.3.4 Types of contaminants and their concentration -- 8.4 Applications of microbial surfactants in water remediation -- 8.4.1 Bioremediation of hydrocarbons -- 8.4.2 Bioremediation of heavy metals -- 8.4.3 Bioremediation of pesticides -- 8.4.4 Bioremediation of explosives -- 8.5 Advantages and limitations of using microbial surfactants in water remediation. -- 8.6 Conclusion -- Conflict of interest -- Acknowledgments -- References -- Chapter Microbial surfactants in food, pharmaceuticals, and agriculture -- 9.1 Introduction: microbial surfactants in food, pharmaceuticals, and agriculture -- 9.2 Microbial surfactants in food -- 9.2.1 Types of microbial surfactants used in the food industry -- 9.3 Applications of microbial surfactants in food processing and preservation -- 9.3.1 Microbial surfactants as emulsifiers, foaming agents, and antiadhesive agents in food industry -- 9.3.2 Safety and regulatory considerations of using microbial surfactants in food -- 9.3.3 Microbial surfactants in pharmaceuticals -- 9.4 Types of microbial surfactants used in the pharmaceutical industry -- 9.4.1 Antimicrobial activity -- 9.4.2 Modulation of cell surface properties -- 9.5 Applications of microbial surfactants in drug delivery and formulation -- 9.5.1 Microbial surfactants as solubilizing agents, emulsifiers, and stabilizers in the pharmaceutical industry -- 9.5.2 Safety and regulatory considerations of using microbial surfactants in pharmaceuticals -- 9.6 Microbial surfactants in agriculture -- 9.6.1 Types of microbial surfactants used in agriculture -- 9.6.2 Applications of microbial surfactants in crop protection and soil remediation -- 9.7 Commercialization and future

outlook -- 9.7.1 Market trends and opportunities for microbial surfactants -- 9.8 Conclusion -- References.
Chapter Potential applications of biosurfactants in the biomedical field.

Sommario/riassunto	A compact derivation of the fundamental physics of piezoelectricity and its applications in classical ultrasonic sensor and actuator systems as well as modern systems where atomistic effects and piezoelectricity together play important roles.
--------------------	--

2. Record Nr.	UNINA9910557719803321
Autore	Shen Xunbing
Titolo	Recognizing Microexpression: An Interdisciplinary Perspective
Pubbl/distr/stampa	Frontiers Media SA, 2019

Descrizione fisica	1 online resource (101 p.)
--------------------	----------------------------

Soggetti	Psychology Science: general issues
----------	---------------------------------------

Lingua di pubblicazione	Inglese
-------------------------	---------

Formato	Materiale a stampa
---------	--------------------

Livello bibliografico	Monografia
-----------------------	------------

Sommario/riassunto	This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact
