Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book explores the history and struggles of the suffragist movement in Colombia, focusing on the women who fought for the right to vote and political equality. Written by historian and diplomat María Clara Ospina Hernández, it highlights the role of education and perseverance in achieving legal and political rights for women. The author provides detailed accounts of key female figures, such as Soledad Acosta, María de los Ángeles Cano, and Esmeralda Arboleda, who paved the way for gender equality. The book also contextualizes the broader societal and historical conditions that marginalized women while celebrating the peaceful nature of their revolution, which culminated in the legislative recognition of women's voting rights in 1954. This work is intended for readers interested in women's history, political revolutions, and human rights.
