Titolo	Ecology of Angola : Terrestrial Biomes and Ecoregions // by Brian John Huntley
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2023
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (xix, 460 pages) : illustrations (chiefly color)
Classificazione	NAT011000SCI020000SCI030000TEC010000
Disciplina	577
Soggetti	Ecology Biodiversity Conservation biology Environmental management Environmental geography Terrestrial Ecology Conservation Biology Environmental Management Integrated Geography
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- Biomes: Concepts, Characteristics and Terminology -- Profiles of Angola's Biomes and Ecoregiens -- Landscapes: Geology, Hydrology and Geomorphology.
Sommario/riassunto	This open access book richly illustrates the first, and comprehensive, account of the country's biomes and ecoregions, the driving forces that account for their diversity and vulnerability, and the ecological principles that provide an understanding of the patterns and processes that have shaped landscapes, ecoregions, and ecosystems. Angola encompasses the greatest diversity of terrestrial biomes and is the second richest in terms of ecoregions, of any African country. Yet its biodiversity and the structure and functioning of its ecosystems are largely undocumented. The author draws on personal field observations from over 50 years of involvement in ecological and conservation studies in Angola and across Southern Africa. The vast recent literature

published by researchers in neighboring, better resourced countries provides depth to the accounts of ecological principles and processes relevant to Angola and thus contributing to the understanding and sustainable management of its natural resources. .
