Sommario/riassunto

This volume is an edited collection of articles dealing with Hispanic contact linguistics in the Americas. The project is composed of four main sections, organized according to the type of socio-historical scenario that characterizes the nature of the contact situation: Spanish in contact with indigenous languages; Spanish in contact with coerced-migration languages; Spanish in contact with free-migration languages; and Spanish in contact with languages outside of Latin America, but still within the Americas.

Sommario/riassunto	This book presents cutting-edge research and developments in the field of biomedical engineering, with a special emphasis on results

achieved in Vietnam and neighboring low- and middle-income countries. Gathering the second volume of the proceedings of the 10th International Conference on The Development of Biomedical Engineering in Vietnam, BME 10, held on July 25-27, 2024, in Phan Thiet, Vietnam, it describes advances in molecular and cellular biology techniques, neuroengineering techniques, and statistical and computational methods, for different biomedical applications, such as drug delivery, medical diagnosis and monitoring. A special emphasis is given to advances promoting Healthcare Evolution towards 5P Medicine in Low- and Middle-Income Countries Ecosystem. All in all, this book offers important answers to current challenges in the field and a source of inspiration for scientists, engineers, and researchers with various backgrounds working in different research institutes, companies, and countries.
