Sommario/riassunto	The Global Latin II Conference has highlighted the role of the Latin

language as cultural medium between West and East. Adopting a diachronic perspective which spans from the Middle Ages to the Modern Age, the conference and its proceedings have paid special attention to texts related to Africa and Asia. The richness of literary genres as well as the dialogue between the Humanities and hard sciences characterize this volume. Students of Classics will find reflections on the role of Latin in the humanistic and missionary traditions, whereas historians of ideas and historians of religions will be able to pinpoint key moments in the use of Latin language and culture in Chinese, Korean, Japanese and Ethiopian contexts. This volume can also be of interest to people working on Digital Humanities and computational linguistics in Latin language, and it represents a novelty on the world scene, along the lines of the previous Global Latin I Conference, which was yet again held in Siena in 2019.
