| Nota di contenuto       | Settlers and slaves: European and African migrations to early modern British America / James Horn and Philip D. Morgan -- Enslavement of Indians in early America: captivity without the narrative / Joye E. Chaplin -- The predicament of ubi: locating authority and national identity in the seventeenth-century English Atlantic / Mark L. Thompson -- "Subjects to the King of Portugal": captivity and repatriation in the Atlantic slave trade (Antigua, 1724) / David Barry Gaspar -- From Catholicism to Moravian pietism: the world of Marotta/Magdalena, a woman of Popo and St. Thomas / Ray A. Kea -- Mariners, merchants, and colonists in seventeenth-century English America / April Lee Hatfield -- The Atlantic rules: the legalistic turn in colonial British America / William M. Offutt -- Jonathan Edwards, The Enlightenment, and the formation of Protestant tradition in America / Avihu Zakai -- Order, ordination, subordination: German Lutheran missionaries in eighteenth-century Pennsylvania / Wolfgang Splitter -- Chartered enterprises and the evolution of the British Atlantic world / |

Elizabeth Mancke -- Seeds of empire: Florida, Kew, and the British imperial meridian in the 1760s / Robert Olwell -- A visual empire: seeing the British Atlantic world from a global British perspective / John E. Crowley -- "Of the old stock": Quakerism and transatlantic genealogies in colonial British America / Karin Wulf.

**Sommario/riassunto**

"Was the British Atlantic shaped more by imperial rivalries or by the actions of subnational groups with a variety of economic, social, and religious agendas? [This book] analyzes the interrelationship between these competing explanations for the development of the British Atlantic by examining migration patterns on both the macro and micro levels. It also scrutinizes the roles played by trade, religion, ethnicity, and class in linking Atlantic borders and the increasingly complicated legal, intellectual, and emotional relationships between the British sovereign and colonial charterholders"--Cover, page [4].

| Sommario/riassunto      | <p>This book reports on advances in mechanical engineering, with a special emphasis on innovative design approaches, constructions and working processes, and on intelligent devices. It discusses physical aspects during pressing and vibrational processing, and findings relating to static stiffness and wear resistance. Further chapters report on the modeling and simulation of mechanical systems using mathematical modeling, numerical simulation, and experimental studies. This book also describes the use of LabVIEW, an infrared camera, and acoustic technology for the control and diagnostic of air leaks and radial runout of gear wheels. It discusses topics concerning the efficiency of systems and processes, reporting on new strategies for improving the design and operation of hydraulic machine rotors, screw and roller presses, and homogenizers, among others. Based on the 8th International Conference on Design, Simulation, Manufacturing: The Innovation Exchange (DSMIE-2025), held on June 17-20, 2025, in Porto, Portugal, this second volume of a 4-volume set provides academics and professionals with extensive information on technologies, trends, challenges, and practice-oriented experience in all the above-mentioned.</p> |
