Sommario/riassunto	This book offers comprehensive coverage on the effect of COVID-19 vaccinations on dermatological diseases. It provides up-to-date information on dermatological disease flare-ups that happen after COVID-19 vaccination. Chapters addresses the role of Covid-19 and its vaccination in common dermatological diseases, whether the patients already had the disease and it complicated after covid-19 or its vaccination, or whether the patient developed new episode of the disease after the pandemic. The last chapter of this book discuss the role of tele-medicine especially tele-dermatology in the Covid-19 era, and how dermatologists transformed to the internet world in the pandemic, including its advantages and disadvantages. COVID-19 Vaccination and Dermatological Diseases is a valuable resource for

practicing dermatologists, dermatology residents, and medical students, as well as general practitioners.
