Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	State governments and their political subdivisions -- The state-local government legal relationship -- State-local fiscal relations -- State mandated local government expenditure distortions -- State responses to local government problems -- The federal influence -- A partnership approach.
Sommario/riassunto	Relations between state governments and their respective local governments are of crucial importance, yet they have remained largely unexplored by scholars. This neglect is all the more surprising in light of the fact that most public services are provided directly to citizens by general-purpose local governments, who are themselves subject to varying degrees of control by their respective state governments. In State-Local Governmental Interactions, Joseph F. Zimmerman builds on work conducted for the US Advisory Commission on Intergovernmental Relations pertaining to local government discretionary authority, intergovernmental service agreements, state and federal mandates, and voluntary and state-mandated transfers of functional responsibility. He demonstrates that the degree of control states exercise over their political subdivisions varies greatly, from very tight control in Vermont

to relatively little control in Maine. Particular emphasis is placed on the legal relationships between a state and its various types of political subdivisions. The volume concludes with recommendations for the establishment of a state-local governmental partnership.

Sommario/riassunto

This book establishes a lay social spirituality for health care practitioners that pursues the Catholic Church's social teachings on the preferential option for the poor, structural sin, and health care reform to address today's commodification of the health care system where maximizing profit and patient's capacity to pay become the primary consideration. Applying a sociotheological approach that combines the perspectives of modern sociology, Catholic social doctrines, and Pope Francis's inductive synodal theology, as well as drawing from secondary literature, media reports, and church documents, it argues for the necessity of a holistic, interdisciplinary, and synodal lay Catholic social spirituality that is informed by Pope Francis's synodality. Presenting sociological research for health care practitioners to uphold options for the poor in public health, it envisions a lay spirituality that participates in civil society's health care reform agenda at the macro level, and practices Christian and Ignatian discernment at the micro level, as its main behavioral components. This book appeals to Christian health care actors, entrepreneurs, and spiritual directors as well as scholars and students in sociology, religion, moral theology, bioethics, and spirituality.
