Turning Your Evidence into Arguments: Results and Discussion -- 5. Drawing Your Conclusions -- 6. Framing Your Methods -- 7. Distributing Credit -- 8. Arranging Matters -- 9. Varying Matters -- 10. Proposing New Research -- 11. Going Public -- 12. Presenting PowerPoint Science -- 13. Organizing PowerPoint Slides -- 14. Composing Scientific English -- 15. Improving Scientific English -- Acknowledgments -- References -- Index
Sommario/riassunto	The ability to communicate in print and person is essential to the life of a successful scientist. But since writing is often secondary in scientific education and teaching, there remains a significant need for guides that teach scientists how best to convey their research to general and professional audiences. The Craft of Scientific Communication will teach science students and scientists alike how to improve the clarity, cogency, and communicative power of their words and images. In this remarkable guide, Joseph E. Harmon and Alan G. Gross have combined their many

Documents from Other Locations in Karanis -- Bibliography -- INDEXES
Sommario/riassunto	This volume of Papyri contains a selection of 25 pieces which were excavated in the village of Karanis in the north-eastern Fayum (Egypt) by American archaeologists between 1924 and 1926. Many of the texts published here come from the archive of a well known figure in the village life of Karanis in the 2nd century AD: Socrates, son of Sarapion, was a tax collector here for many years, serving the Roman Empire collecting taxes due in money and in kind. Besides his successful economic activities - Socrates certainly belonged to the upper stratum of society in Karanis - the tax collector was a lover of Greek literature; for sure, he did not venture into high philosophy and the like, but he

read Homer, comedies, and tried to be up to date about mythology in plays. Half of the new texts published here are literary, mostly from Socrates' library; other texts were found in the immediate neighbourhood of where Socrates lived, such as a surgical treatise about remedies of shoulder dislocations, which perhaps belonged to a doctor. The other half of the papyrus texts in this volume are documents that can shed new light on the activities of the tax collector, or of other inhabitants of Karanis. Altogether they give us a vivid picture of village life in Graeco/Roman Egypt in the 2nd century AD.

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction -- Relevant historical facts -- Epidemiology and pathophysiology of carotid artery diseases -- Diagnosis of carotid artery diseases -- Contemporary medical treatment -- Contemporary surgical treatment -- Future development.
Sommario/riassunto	This book aims to offer a concise and up-to-date overview of carotid artery diseases and their treatments. Authored by experienced

professionals, it caters to a range of specialists in Vascular Surgery, Interventional Radiology, Neurology, and general medicine, providing a comprehensive understanding of carotid artery conditions and available treatment modalities. With a practical approach and clear language, its primary objective is to serve as a quick and useful resource for young doctors interested in this field. Notably, the inclusion of high-quality images and the correlation of imaging findings with operative outcomes enhance its value. By combining theoretical knowledge with practical applications, this book equips readers with the necessary tools to navigate the complexities of carotid artery diseases effectively.
