

1. Record Nr.	UNINA990009083400403321
Autore	Linares, Felipe
Titolo	Introduction to nonlinear dispersive equations / Felipe Linares, Gustavo Ponce
Pubbl/distr/stampa	New York : Springer, c2009
ISBN	978-0-387-84898-3
Descrizione fisica	XI, 256 p. ; 24 cm
Collana	Universitext ; 211
Altri autori (Persone)	Ponce, Gustavo
Disciplina	515
Locazione	MA1
Collocazione	C-6-(211 123-M-9
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA990000845830403321
Autore	Symposium on Trends in applications of mathematics to mechanics : 7.
Titolo	: 1987 Trends in applications of mathematics to mechanics : proceedings of the 7th Symposium, held in Wassenaar, TheNetherlands, December 7- 11, 1987 / edited by J. F. Besseling and W. Eckhaus
Pubbl/distr/stampa	Berlin : Springer-Verlag, 1988
ISBN	3-540-50075-8
Descrizione fisica	IX, 361 p. ; 24 cm
Disciplina	531
Locazione	FINBN
Collocazione	02 60 F 13
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

Nota di contenuto	Chapter 1. The Good Lives Model of Rehabilitation -- Chapter 2. The incorporation of Dynamic Risk Factors into Case Formulations -- Chapter 3. Assessment Framework and Issues -- Chapter 4. Intervention Framework and Issues -- Chapter 5. Reentry Issues and Interventions -- Chapter 6. Community Interventions -- Chapter 7. Forensic Mental Health -- Chapter 8. Extended Case Examples -- Chapter 9. Empirical Support for the GLM as a Practice Framework Theory -- Chapter 10. Policy Implications -- Chapter 11. Future Directions in Research and Practice.
Sommario/riassunto	The book examines the Good Lives Model (GLM) of correctional rehabilitation and its dual aims of risk reduction and well-being enhancement for individuals who have committed crimes. It describes the use of individuals' prioritized values in intervention plans and to capitalize on and further develop their strengths and reduce the risk for future offending. The book directly addresses the differences between purely risk-oriented rehabilitation correctional models (e.g., Risk-Need-Responsivity Model) and strength-based approaches (e.g., GLM) and the clinical advantages of using the latter. It updates the GLM in the context of recent work in evolutionary biology, quality of life and well-being, cognitive neuroscience, developmental psychology, human rights, naturalistic ethics, criminology, desistance research, and theoretical reformulations of dynamic risk and protective factors. Case studies illustrate the detailed application of GLM evidence-based practice plans to adults convicted of crimes and demonstrate the effectiveness of GLM intervention strategies. Key areas of coverage include: GLM community and within-prison intervention strategies. Incorporating dynamic risk factors into GLM case formulations. Incorporating desistance research in postrelease planning and practice. Policy implications of the GLM. The Good Lives Model of Correctional Rehabilitation is a must-have resource for clinicians, therapists, and other professionals as well as researchers, professors, and graduate students in developmental psychology, family studies, forensic psychology, criminology/criminal justice, public health, psychotherapy/counseling, psychiatry, social work, educational policy

and politics, health psychology, nursing, and behavioral
therapy/rehabilitation.
