

1. Record Nr.	UNINA9911016151203321
Autore	P. McGuire Michael
Titolo	Theory Manual for the Load Displacement Compatibility Method (LDC) for Design of Column-Supported Embankments : A Companion to GeogridBridge 3. 0
Pubbl/distr/stampa	Reston : , : American Society of Civil Engineers, , 2024 ©2024
ISBN	0-7844-8563-1 0-7844-8562-3
Edizione	[1st ed.]
Descrizione fisica	1 online resource (59 pages)
Collana	Geotechnical Special Publications ; ; v.356
Altri autori (Persone)	M. HunsteinEric G. HummelElise A. SloanJoel
Soggetti	Geotechnical engineering Embankments
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Half Title -- Title Page -- Copyright Page -- Contents -- Contributors -- Acknowledgments -- Preface -- Notation -- Chapter 1: Introduction -- References -- Chapter 2: Load Transfer Mechanisms -- 2.1Soil Arching -- 2.1.1Incremental Arching Derivation -- 2.1.2Arching Mobilization -- 2.1.2.1Bilinear Adapted Terzaghi -- 2.1.2.2Simplified Ground Reaction Curve -- 2.2Load Transfer through Tensioned Geosynthetic -- 2.2.1Overview of the Parabolic Method -- 2.2.2Derivation of the Parabolic Method -- 2.2.2.1Derivation of the General Form of the Parabolic Method -- 2.2.2.2Parabolic Method Derivation for Triangular Arrays -- 2.2.2.3Parabolic Method Derivation for Square/Rectangular

Arrays

-- 2.3 Drag force

-- References

-- Chapter 3: Consolidation and Compression -- 3.1 Initial and Final

Stresses

-- 3.2 Clays

-- 3.2.1 Ultimate Consolidation Strain

-- 3.2.2 Time Rate of Consolidation

Sommario/riassunto

GSP 356 provides an updated, detailed overview on the theory, history, implementations, and mathematical foundations of the Load Displacement Compatibility method for the design of column-supported embankments.
