

1. Record Nr.	UNINA9911018663403321
Autore	Asharaf Noufal
Titolo	Recent Developments in Spectral and Approximation Theory : Proceedings of the International Conference on Spectral and Approximation Theory (ICSAT-2023) // edited by Noufal Asharaf, Wolfram Bauer, B. V. Rajarama Bhat, Jaydeb Sarkar
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Birkhäuser, , 2025
ISBN	9783031902406 9783031902390
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (368 pages)
Collana	Trends in Mathematics, , 2297-024X
Altri autori (Persone)	BauerWolfram BhatB. V. Rajarama SarkarJaydeb
Disciplina	515.724
Soggetti	Operator theory Functional analysis Approximation theory Operator Theory Functional Analysis Approximations and Expansions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	The life and work of M. N. N. Namboodiri -- On the asymptotic eigenvalue distribution of matrices -- Singular value decomposition of unbounded absolutely minimum attaining operators -- A note on eigenvalues and singular values of variable Toeplitz matrices and matrix-sequences, with application to variable two-step BDF approximations to parabolic equations -- Operators in the Fock- Toeplitz algebra -- Wavelets on the interval: a short survey -- A survey of collectively compact sets of operators and compact operator version of Nayak's theorem -- Survey on the convexity of the Berezin range -- Novel fractional wavelet frame -- On multilinear extensions of mid p- summing operators.
Sommario/riassunto	This book is a collection of recent developments in spectral and

approximation theory. The results collected here were presented at the International Conference on Spectral and Approximation Theory (ICSAT-2023) which took place at Cochin University of Science and Technology in Kerala, India. The conference ICSAT-2023 focuses on two significant areas in mathematics: spectral theory and approximation theory.
