Sommario/riassunto

King Arthur is perhaps the central figure of the medieval world, and the lore of Camelot has captivated literary imaginations from the Middle Ages to the present. Included in this volume are extended entries on more than 30 writers who incorporate Arthurian legend in their works. Arranged chronologically, the entries trace the pervasive influence of Arthurian lore on world literature across time. Entries are written by expert contributors and discuss such writers as Geoffrey of Monmouth, Boccaccio, Chaucer, Mark Twain, John Steinbeck, and Margaret Atwood. Each entry provides biographical infor

Nota di contenuto	General information about tobacco and nicotine products -- Total particulate matter (TPM), "tar", water, nicotine, and carbon monoxide -- Acetamide and acrylamide -- Aflatoxins -- Ammonia -- Aromatic amines -- Carbonyl compounds -- Chlorinated dioxins/furans -- Heterocyclic aromatic amines -- Hydrogen cyanide.
Sommario/riassunto	This book presents a critical review of the analytical methods used for the measurement of harmful and potentially harmful compounds (HPHC) in tobacco and nicotine-related products. In the first chapter of the book, a presentation of the main types of tobacco products is introduced, including cigarettes, cigars, cigarillos, little filter cigars, dissolvable tobacco products, hookah (shisha or waterpipe), nicotine gels, pipe tobacco products, roll your own, smokeless tobacco

products, such as dip, snuff, snus, and chewing tobacco and E-Cigarettes, vapes, and other electronic nicotine delivery systems (ENDS). In the second and main part of the book, the analytical methods for the compounds in the established list from the U.S. Food and Drug Administration (FDA) of HPHC are discussed. For example, in cigarette smoke, specific discussions related to the analytical methods for nicotine, acetaldehyde, acrolein, acrylonitrile, aromatic amines, ammonia, benzene, benzo[a]pyrene, 1,3-butadiene, carbon monoxide, crotonaldehyde, formaldehyde, isoprene, TSNA's, and toluene are presented. Specific analytical methods for the analysis of HPHC in ENDS are also included. Various other analytical methods used for all the 93 HPHC in the established list by FDA for tobacco products and tobacco smoke are presented. The book will be useful to scientists working in the industry as well as students and researchers interested in the area.
