

1. Record Nr.	UNINA9911018815703321
Autore	Rana Tanmoy
Titolo	Epidemiology and Environmental Hygiene in Veterinary Public Health
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , 2025 ©2025
ISBN	9781394208180 1394208189 9781394208166 1394208162 9781394208173 1394208170
Edizione	[1st ed.]
Descrizione fisica	1 online resource (671 pages)
Soggetti	Veterinary public health Veterinary epidemiology Veterinary toxicology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Title Page -- Copyright Page -- Contents -- List of Contributors -- Preface -- Acknowledgments -- Section 1 Impacts of Epidemiology -- Chapter 1 Epidemiology: Principles, Aims and Scope, Methods, Components and Application -- 1.1 Introduction -- 1.1.1 Definition of Veterinary Epidemiology -- 1.1.2 Importance of Veterinary Epidemiology in Safeguarding Animal and Public Health -- 1.2 Principles -- 1.2.1 Understanding Disease Patterns -- 1.2.2 Causation and Association -- 1.2.3 Population Approach -- 1.3 Aims and Scope of Veterinary Epidemiology -- 1.3.1 Surveillance of Animal Diseases -- 1.3.2 Disease Control and Prevention -- 1.3.3 Research and Investigation -- 1.4 Methods in Veterinary Epidemiology -- 1.4.1 Data Collection -- 1.4.2 Methods of Data Collection -- 1.4.3 Statistical Analysis -- 1.4.4 Modelling and Simulation -- 1.5 Components of Veterinary Epidemiology -- 1.5.1 Agent, Host, and Environment -- 1.5.2 Disease Transmission -- 1.5.3 Risk Factors --

1.6 Challenges and Future Trends -- 1.6.1 Emerging Infectious Diseases -- 1.6.2 Data Collection and Analysis Technologies -- 1.6.3 One Health Approach -- 1.7 Conclusion -- References -- Chapter 2 Factors Influencing Livestock Diseases and Animal Productivity -- 2.1 Factors Influencing Livestock Diseases -- 2.1.1 Clinical and Subclinical Disease -- 2.1.2 Carrier State -- 2.1.3 Herd Immunity -- 2.1.4 Incubation Period -- 2.1.5 Modes of Transmission -- 2.2 Determinants of Disease -- 2.2.1 Host Determinants -- 2.2.2 Agent Determinants -- 2.2.3 Environmental Determinants -- 2.3 Factors Influencing Animal Productivity -- Further Reading -- Chapter 3 Determinants of Disease, Adjustment of Rates, Trends and Emergence -- 3.1 Introduction -- 3.2 Determinants of Disease -- 3.2.1 Primary and Secondary Determinants -- 3.2.2 Intrinsic and Extrinsic Determinants. 3.2.3 Determinants Associated with Host, Agent and Environment -- 3.3 Adjustment of Rates, Trends and Emergence -- 3.3.1 Epidemics and Their Investigation -- 3.4 Major Trends in Disease Dynamics -- 3.4.1 The Burden Pyramid of Infectious Disease -- 3.5 Climate Sensitive Diseases, Neglected Tropical Diseases (NTDs), Emerging and Re-emerging Diseases -- 3.5.1 Climate Sensitive Livestock Diseases -- 3.5.2 Economically Important Diseases at the Wildlife-Livestock Interface -- 3.6 Factors and Determinants of Disease Emergence -- 3.7 Future Global Health Challenges -- 3.8 Conclusion -- References -- Chapter 4 Transmission, Maintenance of Infection, and Consequences of Disease -- 4.1 Introduction -- 4.2 The Classic Disease Triangle -- 4.2.1 Rotavirus Diarrhea -- 4.2.2 Kyasanur Forest Disease -- 4.3 Factors Affecting the Spread of Disease -- 4.3.1 Host Factors -- 4.3.2 Agent Factors -- 4.3.3 Effective Contact -- 4.4 Some Basic Concept Related to Disease Transmission -- 4.4.1 Host -- 4.4.2 Reservoir -- 4.4.3 Carrier -- 4.4.4 Vector -- 4.4.5 Fomite -- 4.5 Chain of Transmission -- 4.6 Modes of Transmission -- 4.6.1 Direct Transmission -- 4.6.2 Indirect Transmission -- 4.7 Methods of Transmission -- 4.7.1 Ingestion -- 4.7.2 Inhalation -- 4.7.3 Inoculation -- 4.7.4 Venereal -- 4.7.5 Contact -- 4.7.6 Iatrogenic -- 4.8 Maintenance of Infection -- 4.8.1 Hit and Run -- 4.8.2 Resistant Form -- 4.8.3 Biofilm -- 4.8.4 Hit and Stay/Persistence Within Host -- 4.8.5 Extended Host Range -- 4.8.6 No Environmental Stage -- 4.9 Consequences of Disease -- 4.9.1 Active Disease -- 4.9.2 Latency -- 4.9.3 Recovery -- 4.9.4 Death -- 4.9.5 Carrier Stage -- 4.9.6 Chronic Stage -- References -- Chapter 5 Ecology of Diseases, Hypothesis, and Life Table Technique and Its Application -- 5.1 Introduction -- 5.2 Disease Ecology and Factors in Emergence. 5.2.1 Population Ecology, Genetics, and Emergence Disease -- 5.3 Ecological Monitoring -- 5.4 Environmental Factors -- 5.4.1 Permanent Attributes -- 5.4.2 Semipermanent Environmental Attributes -- 5.4.3 Insolation -- 5.4.4 Faunal Factors -- 5.4.5 Techniques for Ecological Monitoring -- 5.4.6 Practical Application of Veterinary Data Acquired by Ecological Monitoring -- 5.5 Life Table Techniques and Application -- 5.5.1 Life Table Varieties -- 5.5.2 Cohort Life Tables -- 5.5.3 Static Life Tables -- 5.5.4 Life Table Parameters -- 5.5.5 Reproductive Value -- References -- Chapter 6 Measures of Occurrence of Disease Pattern and Association -- 6.1 Introduction -- 6.2 Definition of Disease -- 6.3 Pathways Through Which Pathogenic Pathogens Cause Livestock Diseases -- 6.4 Disease Incidence Patterns -- 6.4.1 Incidence of Sporadic Diseases -- 6.4.2 Incidence of Endemic Diseases -- 6.4.3 Incidence of Epidemic Diseases -- 6.4.4 Incidence of Pandemic Diseases -- 6.5 Finding the Disease's Level -- 6.5.1 Example A -- 6.5.2 Example B -- 6.6 Correlation Between Incidence and Prevalence -- 6.7

Investigating Illness Outbreaks is Important -- 6.8 Strategies for Controlling Animal Diseases -- 6.9 Conclusion -- References -- Chapter 7 Animal Disease Surveillance, Survey Systems, and Associate Indices -- 7.1 Introduction -- 7.2 Definition -- 7.3 A Survey of Potential Methods for Examining the Surveillance System's Configuration -- 7.4 MOSS Data Collection Method -- 7.5 Targeted Surveillance -- 7.6 Implications of the Trade Regulation Change on MOSS Planning and Implementation -- 7.7 Conclusion -- References -- Chapter 8 Epidemiological Studies, Measures of Disease Frequency, and Mortality -- 8.1 Introduction -- 8.1.1 Epidemiological Studies -- 8.1.2 Observational Epidemiological Study -- 8.1.3 Experimental Epidemiology -- References -- Chapter 9 Animal Disease Alerts and Forecasting. 9.1 Introduction -- 9.2 The Purpose of Forecasting -- 9.3 Early Warning: What Is It? -- 9.4 Initiatives for Early Warning -- 9.5 Role of International Organizations in Taking the Lead in Early Warning System Development -- 9.5.1 The Early Warning System of the Office International Des Epizooties (OIE) -- 9.5.2 Food and Agriculture Organization -- 9.5.3 World Health Organization -- 9.6 Global Early Warning and Response System (GLEWS) -- 9.6.1 Aims of GLEWS -- 9.6.2 GLEWS Combined Risk Assessment for Zoonotic Diseases -- 9.6.3 The Following National and Regional Networks Support GLEWS (Angot 2009) -- 9.6.4 The GLEWS Method for Treating Highly Pathogenic Avian Influenza (HPAI) -- 9.6.5 Vector-Borne Diseases: Rift Valley Fever (RVF) and the GLEWS Approach -- 9.6.6 Early Warning System (EWS) Components Include -- 9.7 Geographical Information System (GIS) -- 9.8 Disease Prognosis in India -- 9.8.1 Network for Surveillance of Animal Diseases -- 9.8.2 Centre for Animal Disease Research and Diagnosis (CADRAD) -- 9.8.3 PDADMAS (Project Directorate on Animal Disease Monitoring and Surveillance) Bangalore -- 9.8.4 Epi-Info™ (Analysis Project on Livestock Disease Forecasting/Forewarning) -- 9.8.5 NADRES (National Animal Disease Referral Expert System) -- 9.9 Conclusion -- References -- Chapter 10 Strategies of Disease Management: Prevention, Control, and On-farm Biosecurity -- 10.1 Strategies of Disease Management: Prevention -- 10.1.1 Disease Prevention Strategies -- 10.2 Strategies of Disease Management: Control -- 10.2.1 Chemoprophylaxis -- 10.2.2 Chemotherapy -- 10.2.3 Slaughter -- 10.2.4 Control of Internal Parasites by Deworming -- 10.2.5 Disinfection -- 10.3 Strategies of Disease Management: Biosecurity Measures -- 10.3.1 Locational Biosecurity -- 10.3.2 Structural Biosecurity -- 10.3.3 Operational Biosecurity -- 10.3.4 Continuous Biosecurity -- References. Chapter 11 Economic Impact on Animal Diseases -- 11.1 Introduction -- 11.2 Economics of Animal Disease -- 11.2.1 Basic Economic Model -- 11.2.2 Common Modeling Techniques in Animal Health Economics -- 11.3 Economic Impact of Transboundary Animal Diseases -- 11.3.1 Economic Viability of an Intervention to Prevent or Control a TAD -- 11.4 Global Burden of Animal Diseases Program -- 11.5 Estimation of Economic Losses Due to Animal Diseases -- 11.5.1 Loss from Mortality -- 11.5.2 Loss in Milk Yield -- 11.5.3 Treatment Costs -- 11.5.4 Transboundary Animal Diseases -- 11.5.5 Climate-sensitive Diseases -- 11.6 Advances in Estimating the Cost of Animal Disease Outbreaks -- 11.6.1 Vector Error Correction Model -- 11.6.2 OutCosT -- 11.7 Conclusion -- References -- Chapter 12 International Laws and Regulations on Controlling Livestock Diseases -- 12.1 Introduction -- 12.2 Some Diseases of Animals Acts in Botswana -- 12.3 Regulations in Victoria -- 12.4 Regulations in India -- 12.4.1 Assistance to States for Control of Animal Diseases (ASCAD) -- 12.4.2 Peste des Petits

Ruminants Eradication Program (PPR-EP) -- 12.4.3 Establishment and Strengthening of Existing Veterinary Hospitals and Dispensaries (ESVHD) -- 12.4.4 Mobile Veterinary Units -- 12.4.5 Call Centers -- 12.4.6 Classic Swine Fever Control Program (CSF-CP) -- 12.5 Animal Health Law -- References -- Chapter 13 Role of OIE in Global Trade in Animals and Animal Products -- 13.1 Introduction -- 13.2 Benefits and Barriers of International Trade -- 13.3 OIE Internal Standards, Guidelines, and Recommendations for Animal and Aquatic Health -- 13.3.1 Establishment of the World Trade Organization (WTO) and the Sanitary and Phytosanitary Measures (SPS) Agreement -- 13.4 Epidemiology and Risk Analysis -- 13.5 Concepts of Disease as Trade-facilitating Measures -- 13.6 Conclusion -- References.  
Chapter 14 Comparative Epidemiological Studies.

## Sommario/riassunto

Understanding the emergence and progress of zoonotic diseases  
Veterinary epidemiology is the study of the connection between animal exposure to chemical or disease agents and the observation of adverse effects. Veterinary epidemiologists observe the patterns by which diseases emerge in a population and play a crucial role in controlling emerging disease outbreaks and preventing infections. The major factors in environmental hygiene which have a tendency to produce disease and adverse health effects in animals require extensive study and play a potentially massive role in public health. Epidemiology and Environmental Hygiene in Veterinary Public Health provides a one-stop reference for professionals in this vital field. Its exploration of environmental illnesses and pollutants in combination with biological disease vectors has no current rivals in the marketplace. With readable design and coverage of all major factors of epidemiological significance, the volume offers a unique contribution to the control of animal disease. Epidemiology and Environmental Hygiene in Veterinary Public Health readers will also find: Schematic overview of the fundamentals of environmental hygiene and epidemiology Detailed discussion of topics including etiological factors, preventative and control strategies, major disease agents, and many more Color figures, line figures, and tables to illustrate key concepts Epidemiology and Environmental Hygiene in Veterinary Public Health is ideal for all professionals and researchers in animal epidemiology and environmental hygiene, as well as for farm managers, agricultural veterinarians, and other professionals involved in large-scale animal care.
