

1. Record Nr.	UNINA9911018856003321
Autore	Najafzadeh Mohammad
Titolo	Scouring at Bridge Piers Using Artificial Intelligence Models : Implementation and Prediction
Pubbl/distr/stampa	Reston : , : American Society of Civil Engineers, , 2025 ©2025
ISBN	0-7844-8607-7 0-7844-8606-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (351 pages)
Collana	ASCE Press Series
Soggetti	COMPUTERS / Data Science / Data Modeling & Design SCIENCE / Mechanics / Hydrodynamics TECHNOLOGY & ENGINEERING / Civil / Bridges
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Author Mohammad Najafzadeh evaluates the effectiveness of four AI models--Gene-Expression Programming (GEP), Evolutionary Polynomial Regression (EPR), Model Tree (MT), and Multivariate Adaptive Regression Spline (MARS)--in predicting local scour depth at bridge piers, emphasizing their physical consistency and interpretability compared to traditional methods.
