### Sommario/riassunto

This volume is the first complete study of the 12th-century CE Byzantine philosopher Nicholas of Methone, offering a critical examination of a key moment in 11th–12th-century Byzantine philosophy. Although traditionally regarded as a polemical commentator on the late Neoplatonist Proclus, this volume highlights Nicholas' substantial contribution to metaphysics and philosophical theology. It also situates his work within the broader intellectual context where Neoplatonism and its relation to Byzantine Christian theology were actively debated. The contributions gathered here are of particular significance for those interested in the Byzantine afterlife of late antique Neoplatonism and its legacy in the later Byzantine tradition and the Renaissance.
