Sommario/riassunto

The book 'Complementary Medicine for Veterinary Technicians and Nurses' by Nancy Scanlan provides an in-depth exploration of holistic and complementary therapies in veterinary medicine. It serves as a comprehensive guide for veterinary technicians and nurses, detailing various holistic practices such as acupuncture, herbal medicine, chiropractic, massage therapy, and more. The book aims to educate veterinary professionals on the integration of these alternative therapies with conventional veterinary practices to enhance animal care. It addresses legal implications, safety considerations, and the role of veterinary technicians in holistic practices. This edition updates the knowledge base with recent research and applications, making it a valuable resource for professionals seeking to expand their expertise in holistic veterinary care.
