Sommario/riassunto	"This book discusses essential formulation development and delivery information for novel and controlled delivery systems of herbal ingredients. The contributing authors present a step-by-step approach for preparing and manufacturing dosage forms and delivery systems, helping the reader understand methods used in laboratories. Additional coverage deals with regulatory issues of quality, safety, and efficacy of herbal formulations. Each chapter follows a similar model to address key aspects of these topics -- including basics, functional materials, manufacturing, and marketing"-- Provided by publisher.
