

1. Record Nr.	UNINA9911019131103321
Titolo	Advances in enzymology and related subjects of biochemistry . Volume XVII // edited by F. F. Nord
Pubbl/distr/stampa	New York, : Wiley, 1956
ISBN	1-282-68232-6 9786612682322 0-470-12262-5 0-470-12339-7
Edizione	[11th ed.]
Descrizione fisica	1 online resource (566 p.)
Collana	Advances in enzymology and related subjects of biochemistry ; ; 17
Altri autori (Persone)	NordF. F
Disciplina	612.0151
Soggetti	Clinical enzymology Enzymes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	ADVANCES IN ENZYMOLOGY AND RELATED SUBJECTS OF BIOCHEMISTRY; CONTENTS; Enzyme Kinetics; The Respiratory Chain and Oxidative Phosphorylation; Solubilization, Migration, and Utilization of Insoluble Matter in Nature; Enzymatic Phosphate Transfer; The Formation of Oligosaccharides by Enzymic Transglycosylation; Nature and Function of Metalloflavoproteins; Chemistry and Biochemistry of Xanthine Oxidase; Some Controversial Aspects of the Mammalian Cytochromes; Metabolic Aspects of Chemical Genetics; Ribonucleic Acids and Virus Multiplication; Author Index; Subject Index Cumulative Index of Volumes I-XVII
Sommario/riassunto	Advances in Enzymology and Related Areas of Molecular Biology is a seminal series in the field of biochemistry, offering researchers access to authoritative reviews of the latest discoveries in all areas of enzymology and molecular biology. These landmark volumes date back to 1941, providing an unrivaled view of the historical development of enzymology. The series offers researchers the latest understanding of enzymes, their mechanisms, reactions and evolution, roles in complex biological process, and their application in both the laboratory and industry. Each volume in the series features
