

1. Record Nr.	UNINA9911019139603321
Autore	Ciuonzo Domenico
Titolo	Wireless Sensor Networks in Smart Environments : Enabling Digitalization from Fundamentals to Advanced Solutions
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , 2025 ©2025
ISBN	1-394-24987-X 1-394-24986-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (419 pages)
Collana	IEEE Press Series on Sensors Series
Altri autori (Persone)	Salvo RossiPierluigi
Disciplina	006.2/5
Soggetti	Wireless sensor networks Internet of things
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"The underlying core of the book is on WSNs and the IoT. The Internet of Things (IoT) is an ecosystem of physical devices, vehicles, buildings, and other objects that are embedded with sensors, software, and network connectivity, allowing them to collect and exchange data. Wireless Sensor Networks (WSNs) are a key component of the IoT, as they provide a means of collecting and transmitting data from these connected devices and represent the "sensing arm" of IoT"-- Provided by publisher.
